**Code** Lawrence Lessig, 1999 There s a common belief that cyberspace cannot be regulated that it is in its very essence immune from the government s or anyone else s control Code argues that this belief is wrong It is not in the nature of cyberspace to be unregulable cyberspace has no nature It only has code the software and hardware that make cyberspace what it is That code can create a place of freedom as the original architecture of the Net did or a place of exquisitely oppressive control If we miss this point then we will miss how cyberspace is changing Under the influence of commerce cyberspace is becoming a highly regulable space where our behavior is much more tightly controlled than in real space But that s not inevitable either

We can we must choose what kind of cyberspace we want and what freedoms we will guarantee These choices are all about architecture about what kind of code will govern cyberspace and who will control it In this realm code is the most significant form of law and it is up to lawyers policymakers and especially citizens to decide what values that code embodies
