[SIAM Journal on Control and Optimization](#) Society for Industrial and Applied Mathematics, 1985      [Handbook of Memetic Algorithms](#) Ferrante Neri, Carlos Cotta, Pablo Moscato, 2011-10-18 Memetic Algorithms MAs are computational intelligence structures combining multiple and various operators in order to address optimization problems. The combination and interaction amongst operators evolves and promotes the diffusion of the most successful units and generates an algorithmic behavior which can handle complex objective functions and hard fitness landscapes. [Handbook of Memetic Algorithms](#) organizes in a structured way all the the most important results in the field of MAs since their earliest definition until now. A broad review including various algorithmic solutions as well as successful applications is included in this book. Each class of optimization problems such as constrained optimization multi objective optimization continuous vs combinatorial problems uncertainties are analysed separately and for each problem memetic recipes for tackling the difficulties are given with some successful examples. Although this book contains chapters written by multiple authors a great attention has been given by the editors to make it a compact and smooth work which covers all the main areas of computational intelligence optimization. It is not only a necessary read for researchers working in the research area but also a useful handbook for practitioners and engineers who need to address real world optimization problems. In addition the book structure makes it an interesting work also for graduate students and researchers in related fields of mathematics and computer science.

[Handbook of Real-Time Computing](#) Yu-Chu Tian, David Charles Levy, 2022-08-08 The aim of this handbook is to summarize the recent rapidly developed real time computing technologies from theories to applications.
