Paris 1961 Algerians State Terror And Memory:

Paris 1961 Jim House, Neil MacMaster, 2009-02-01 The massacre of Algerian demonstrators by the Paris police on the night of 17 October 1961 is one of the most contested events in contemporary French history This book provides a multi layered investigation of the repression through a critical examination of newly opened archives oral sources the press and contemporary political movements and debates The roots of violence are traced back to counter insurgency techniques developed by the French military in North Africa and introduced into Paris to crush the independence movement among Algerian migrant workers The study shows how and why this event was rapidly expunged from public visibility in France but was kept alive by immigrant and militant minorities to resurface in a dramatic form after the 1980s Through this case study the authors explore both the dynamics of state terror as well as the complex memorial processes by which these events continue to inform and shape post colonial society Multidirectional Memory Michael Rothberg, 2009-06-15

Multidirectional Memory brings together Holocaust studies and postcolonial studies for the first time to put forward a new theory of cultural memory and uncover an unacknowledged tradition of exchange between the legacies of genocide and colonialism **Forgetful Remembrance** Guy Beiner, 2018 Forgetful Remembrance offers a new approach to the study of memory by focusing on vernacular historiographies and the notion of forgetting Using the 1798 Irish Rebellion Beiner

explores how communities try to obscure inconvenient and uncomfortable events from the past **Is Theory Good for the Jews?** Bruno Chaouat, 2016 By looking back to the emergence of a postwar theoretical discourse on trauma memory victims suffering the Holocaust and the Jews *Is Theory Good for the Jews* explores how French thought is implicated in intellectual literary and ideological components of the global and local upsurge of antisemitism **The Politics of Culture** Christian

Jacobs, 2025-11-13 The book analyzes how three political movements used the concept of culture in France between the late 1960s and the early 1980s the women s liberation movement immigrant movements and a far right movement around the group GRECE What did culture mean to the movements and when and why did they use the concept The book discusses intellectual labor beyond well known thinkers in both the practice and the theory of political activists It helps readers understand the high brow debates around the culture wars and the cultural turn as part of a larger societal trend that surpasses the academic field It offers historical explanations beyond academia because of its focus on primary sources from quotidian political struggles Two contexts shaped concepts of culture in society more broadly First decolonization as an intellectual and political development redefined political key concepts such as culture Second change through culture replaced earlier visions in which the state was seen as the central instrument for political change Methodologically the book treats political movements as production sites of concepts thereby connecting intellectual history with political and social history **Memories of Mass Repression** Selma Leydesdorff, 2017-07-05 Memories of Mass Repression presents the

results of researchers working with the voices of witnesses Its stories include the witnesses victims and survivors it also

reflects the subjective experience of the study of such narratives The work contributes to the development of the field of oral history where the creation of the narrative is considered an interaction between the text of the narrator and the listener The contributors are particularly interested in ways in which memory is created and molded The interactions of different even conflicting memories of other individuals and society as a whole are considered In writing the history of genocide emotional memory and objective research are interwoven and inseparable It is as much the historian's task to decipher witness account as it is to interpret traditional written sources These sometimes antagonistic narratives of memory fashioned and mobilized within public and private arenas together with the ensuing conflicts paradoxes and contradictions that they unleash are all part of efforts to come to terms with what happened Mining memory is the only way in which we can hope to arrive at a truer and less biased historical account of events Memory is at some level selective Most believers in political movements turned out to be the opposite of what they promised When given a proper forum stories that are in opposition to dominant memories or in conflict with our own memories can effectively battle collective forgetting This volume offers the reader a vision of the subjective side of history without falsifying the objective reality of human survival *Unsettling French Algeria* Benjamin P. Nickels, 2007

The Construction of Minority Identities in France and Britain Gino G. Raymond, Tariq Modood, 2007-11-09 Britain and France have divergent attitudes to the issue of minority identities Whilst the British emphasise multiculturalism allowing that it is possible to combine race or faith with a British identity the French view such a combination of religion and nationality as unacceptable However recent events have challenged these traditional approaches to minorities The London bombings of July 2005 and the fact that the perpetrators were British threw into question the assumption that the elevation of difference could lead to community cohesion whilst riots in Birmingham in October 2005 between black and Asian communities further highlighted tensions Similarly French certainties about their proactive attitude to the integration of minorities into a national community unified by common value were profoundly shaken by rioting in urban areas

Noeuds de Mémoire Michael Rothberg, Debarati Sanyal, Maxim Silverman, 2010 The work of polymath Jean Francois Lyotard has proved seminal in the best sense of the word original and historical both fundamental and far reaching neither partisan nor exclusive This retrospective volume deals with the extraordinary breadth of Lyotard's thought and his wide ranging impact on critical thinking in the late twentieth century Book Jacket

Historicising the French Revolution Carolina Armenteros, 2008 Three decades ago Francois Furet famously announced that the French Revolution was over Napoleon's armies ceased to march around Europe long ago and Louis XVIII even returned to occupy the throne of his

guillotined brother And yet the Revolution TM s memory continues to hold sway over imaginations and cultures around the world This sway is felt particularly strongly by those who are interested in history for the French Revolution not only altered the course of history radically but became the fountainhead of historicism and the origin of the historical mentality The sixteen essays collected in this volume investigate the Revolution TM s intellectual and material legacies From popular culture to education and politics from France and Ireland to Poland and Turkey from 1789 to the present day leading historians expose alongside graduate students the myriad ways in which the Revolution changed humanity TM s possible futures its history and the idea of history They attest to how the Revolution has had a continuing global significance and is still shaping the world today

France Since 1870 Charles Sowerwine,2009-01-08 Widely praised when it was first published this new edition has been brought up to the present and thoroughly revised to take into account the latest research It now includes maps and more coverage of topics such as racial strife colonial difficulties France s role in post war European integration including the EU and women and gender

Immigration and National Identity Rabah Aissaoui,2009-03-30 Immigration is at the heart of social cultural and political debate in France a country still struggling to come to terms with its postcolonial legacy Here Assaoui provides a radical re examination of the assumptions about immigrants and ethnic and national identity through a study of the Maghrebis especially their political mobilisation from the colonial to the postcolonial period Combining insights from the archive and interviews with political activists he examines the diaspora s voice and their struggle against racism and oppression Through a study of key political movements he shows how they constructed a powerful and consistent political tradition and charts the development in France of the Algerian anti colonial and nationalist movement as well as new forms of political activism during the 1970s Immigration and National Identity foregrounds the migrants perspective and the necessary historical background to the fraught contemporary context of immigrant communities in France It will be valuable for all those concerned with immigration colonialism and postcolonialism cultural studies sociology and the study of contemporary France

owes to foreign cultures in this way emphasizing Hungary's role as a bridge for inter cultural communication The present work comports entirely with this aim as well as having its focus on one of the most important events in post war Hungarian and European history the Revolution of 1956 preface p ix [African American Review](#) ,2012
