CHAPTER 6

DOMINANT-MINORITY RELATIONS

LEARNING OBJECTIVES

- 6.1 Analyze common patterns of minority-group responses.
- 6.2 Examine the negative impact of living outside the mainstream.
- 6.3 Analyze common patterns of dominant-group actions toward minorities.
- 6.4 Analyze various patterns of exploitation.
- 6.5 Examine the concern over potential dangers in minority-minority relations.

SUMMARY

1. Groups outside of the societal mainstream typically develop their own group identity based on ethnic (cultural or national) ties or race. The ethnic group's identity endures through resilient ethnic communities, minority media, and socialization. It can be especially long-standing on the basis of religion, whether among persistent subcultures or large groups of recent arrivals. Because of the strong presence of social definitions of race based on color, White ethnics will often assimilate over time while non-White ethnics will often develop a racial group identity. This identity provides in-group bonding that satisfies the need for belonging, helps develop a sense of pride, and serves as a buttress against racism. Group identity may have positive or negative consequences, and is thus an important social phenomenon in the study of race and ethnic relations.
