## **Participatory Visual And Digital Methods Developing Qualitative Inquiry:**

Participatory Visual and Digital Methods Aline Gubrium, Krista Harper, 2016-06-16 Gubrium and Harper describe how visual and digital methodologies can contribute to a participatory public engaged ethnography. These methods can change the traditional relationship between academic researchers and the community building one that is more accessible, inclusive, and visually appealing, and one that encourages community members to reflect and engage in issues in their own communities. The authors describe how to use photovoice, film, and video, digital storytelling, GIS, digital archives, and exhibits in participatory contexts and include numerous case studies demonstrating their utility around the world. *Engaging in Narrative Inquiries with Children and Youth* Jean Clandinin, Vera Caine, Sean Lessard, Janice Huber, 2016-03-24

Renowned scholar and founder of the practice of narrative inquiry, Jean Clandinin and her coauthors provide researchers with the theoretical underpinnings and processes for conducting narrative inquiry with children and youth. Exploring the unique ability of narratives to elucidate the worldview of research subjects, the authors highlight the unique steps and issues of working with these special populations. The authors address key ethical issues of anonymity and confidentiality, the relational issues of co-composing field and research texts with subjects, and working within the familial contexts of children and youth. The book includes numerous examples from the authors' studies and others, many from indigenous communities, to show narrative inquiry in action. This book should be invaluable to researchers in education, family relations, child development, and children's health and services. *Fiction as Research Practice* Patricia Leavy, 2016-06-16 Patricia Leavy herself, both a highly published qualitative researcher and a novelist, explores the overlaps and intersections between these two ways of understanding and describing human experience, including a methodological introduction and five stories showing these methods in action.

It is his first comprehensive statement of phenomenological thought and research in over a decade. Phenomenology of practice refers to the meaning and practice of phenomenology in professional contexts such as psychology, education, and health care, as well as to the practice of phenomenological methods in contexts of everyday living. Van Manen presents a detailed description of key phenomenological ideas as they have evolved over the past century; he then thoughtfully works through the methodological issues of phenomenological reflection, empirical methods, and writing, that a phenomenology of practice offers to the researcher. Van Manen's comprehensive work will be of great interest to all.
