Cyber Security Payment Card Industry Data Security Standard (PCI DSS) Mark Hayward, 2025-06-06 The core goal of the Payment Card Industry Data Security Standard (PCI DSS) is to protect sensitive payment card information from theft and misuse. Organizations handling cardholder data are required to implement a set of security measures that collectively form a barrier against cybercriminals and other malicious actors. These measures aim to secure all aspects of payment processing from data storage to transmission, ensuring that customer information remains confidential and safe from unauthorized access. PCI DSS serves as a benchmark for security practices in the payment industry, promoting a culture of ongoing vigilance and risk management. Its foundation lies in practical steps that organizations can take to reduce the risk of data breaches, which can cause not only financial loss but also damage to reputation and customer trust.
