

## PCV USER'S GUIDE

There is more information and instructions available on the supplied CD:

Now that you have installed your Power Commander there is a brief overview on how to use the unit.

The Power Commander is shipped with a map for a completely stock bike unless it is special ordered with a different map. If it is necessary to load a map for a different configuration you will need to perform the following steps:

- First you will need to insert the supplied CD into your computer. The CD is designed to automatically start running upon inserting into the drive. It may take a few seconds for the setup menu to appear. If it does not begin to run after 30 seconds go to the "My Computer" icon and double click it. Then double click the "CD drive" icon. Lastly, double click "powercommander.exe". This will manually start the CD.
- In order for the Power Commander to communicate with the computer the Power Commander Control Center Software must first be installed. Click on "install software" in the menu and follow the directions. (This will create a folder called C:\Program Files\Power Commander & that the software and maps will be stored in.)
- From the CD you will need to transfer the map database for your particular bike(s). Click on "map database". Find your model from the list and click on the model. (This will automatically install all the maps for that model to the C:\Program Files\Power Commander & folder.)

**The latest software and maps can be found at  
[www.powercommander.com](http://www.powercommander.com)**

- The PCV maps are not the same as the PCB maps. Load a map that has a .pov file extension only.
- In order to send a map to the Power Commander you must first connect the USB cable to the computer and to the Power Commander unit. Make sure that the cable is fully seated into the Power Commander. There is a detent on the cable that could require light pressure to fully engage the cable. Open the Power Commander software by double clicking the PCV icon on your desktop. Click on OPEN MAP FILE and select the file you want to use from the database. Once the map is shown in the grid area click on [SEND MAP].
- The values in the map represent a percentage of fuel change over stock. If you set a value of 10 in the map then at the throttle position and RPM range the bike will be 10% richer than stock. If the value was a -10 then it would be 10% leaner than stock. You have the ability to fine tune your fuel curve by altering these values. We recommend leaving this to one of our Tuning Centers as they have the ability to accurately read the actual curve which allows them to optimize the fuel curve for every cell. Without having the ability to read the actual ratio of the bike it is impossible to accurately make fine adjustments to your fuel curve.
- If you disconnect the battery or disconnect the Power Commander from the bike it will not load the map. The only way to use the map is to download another map to the unit.
