Probability and Statistical Inference Robert V. Hogg, Elliot A. Tanis, 1983      Analysis, Design and Evaluation of Man-Machine Systems 1995 T.B. Sheridan, 2014-05-23 The series of IFAC Symposia on Analysis Design and Evaluation of Man Machine Systems provides the ideal forum for leading researchers and practitioners who work in the field to discuss and evaluate the latest research and developments This publication contains the papers presented at the 6th IFAC Symposium in the series which was held in Cambridge Massachusetts USA      Optimizing Oracle Performance Cary Millsap, Jeff Holt, 2003-09-16 Oracle system performance inefficiencies often go undetected for months or even years even under intense scrutiny because traditional Oracle performance analysis methods and tools are fundamentally flawed They re unreliable and inefficient Oracle DBAs and developers are all too familiar with the outlay of time and resources blown budgets missed deadlines and marginally effective performance fiddling that is commonplace with traditional methods of Oracle performance tuning In this crucial book Cary Millsap former VP of Oracle s System Performance Group clearly and concisely explains how to use Oracle s response time statistics to diagnose and repair performance problems Cary also shows how queueing theory can be applied to response time statistics to predict the impact of upgrades and other system changes Optimizing Oracle Performance eliminates the time consuming trial and error guesswork inherent in most conventional approaches to tuning You can determine exactly where a system s performance problem is and with equal importance where it is not in just a few minutes even if the problem is several years old Optimizing Oracle Performance cuts a path through the complexity of current tuning methods and streamlines an approach that focuses on optimization techniques that any DBA can use quickly and successfully to make noticeable even dramatic improvements For example the one thing database users care most about is response time Naturally DBAs focus much of their time and effort towards improving response time But it is entirely too easy to spend hundreds of hours to improve important system metrics such as hit ratios average latencies and wait times only to find users are unable to perceive the difference And an expensive hardware upgrade may not help either It doesn t have to be that way Technological advances have added impact efficiency measurability predictive capacity reliability speed and practicality to the science of Oracle performance optimization Optimizing Oracle Performance shows you how to slash the frustration and expense associated with unraveling the true root cause of any type of performance problem and reliably predict future performance The price of this essential book will be paid back in hours saved the first time its methods are used      **Natural and Man-Made Catastrophes** S. Niggol Seo, 2019-01-14 A thorough explanation of the mathematical theories philosophies and economics of catastrophes with a view to how humanity should be prepared for events with catastrophic consequences This book presents a holistic view of natural and man made catastrophes from mathematical theories and philosophy through to economics and policy It is both academic and applied in its approach offering both empirical evidence and academic reflections to give a new perspective on an ever developing topic and providing many

examples of public policy and catastrophe responses from around the world Natural and Man made Catastrophes Theories Economics and Policy Designs begins by introducing readers to numerous natural and man made catastrophes and how catastrophe theories have played a pivotal role in designing policies and responses to them It discusses hurricanes earthquakes nuclear disaster asteroid collision Large Hadron Collider artificial intelligence uncontrollable robots global warming infectious diseases without antibodies and bioterrorism It clarifies key mathematical and scientific theories such as catastrophe theory chaos singularity fractal tipping point unbounded variance fat tail and Feigenbaum constant on catastrophes The book goes on to examine ancient and contemporary philosophies that have played critical roles in humanity's understanding of catastrophic outcomes The book critically builds the economics of catastrophic events 1 by consolidating the catastrophe literature in natural sciences scientific theories and philosophy 2 by constructing global empirical catastrophe data and analytical models using historical data on hurricanes and earthquakes 3 and by critically reviewing policy experiences on the aforementioned catastrophic events Lays the foundation for the economic analyses and policy making on potential humanity universe threatening catastrophes Includes many examples of public policy and behavioral responses to catastrophes from around the world Provides a wide ranging commentary on crucial implications of the studies models and concepts of catastrophes Synthesizes the catastrophe literature in mathematical theories philosophical traditions economic analyses policy studies and contemporary concerns Natural and Man made Catastrophes Theories Economics and Policy Designs is an important book for students teachers professionals and policy makers who are involved in environmental research and disaster response
