**European Public Procurement** Caranta, Roberto, Sanchez-Graells, Albert, 2021-10-26 This detailed Commentary provides an authoritative interpretation of each provision in the main EU Directive on public procurement Directive 2014/24/EU and is rich in its critical analysis of the provisions of the 2014 Directive and the case law. The Commentary also highlights the application problems and interpretative issues being raised in EU Member States which in due time will make their way up to the CJEU or even require further legislative interventions. *Public Procurement and the EU Competition Rules* Albert Sánchez Graells, 2015-06-25 Public procurement and competition law are both important fields of EU law and policy intimately intertwined in the creation of the internal market. Hitherto their close connection has been noted but not closely examined. This work is the most comprehensive attempt to date to explain the many ways in which these fields often considered independent of one another interact and overlap in the creation of the internal market. This process of convergence between competition and public procurement law is particularly apparent in the 2014 Directives on public procurement which consolidate the principle of competition in terms very close to those advanced by the author in the first edition. This second edition builds upon this approach and continues to ask how competition law principles inform and condition public procurement rules and whether the latter in their revised form are adequate to ensure that competition is not distorted. The second edition also deepens the analysis of the market behaviour of the public buyer from a competition perspective. Proceeding through a careful assessment of the general rules of competition and public procurement the book constantly tests the efficacy of these rules against a standard of the proper functioning of undistorted competition in the market for public procurement. It also traces the increasing relevance of competition considerations in the case law of the Court of Justice of the European Union and sets out criteria and recommendations to continue influencing the development of EU Economic Law.

**Services of General Economic Interest as a Constitutional Concept of EU Law** Caroline Wehlander, 2016-06-23 This book offers a legal understanding regarding the core elements of SGEI Services of General Interest and of how the post Lisbon constitutional framework on SGEI affects the application of the EU market rules by the EU Court of Justice including procurement rules to public services. It is built up of three parts namely Part I No Exit from EU Market Law for Public Services Part II SGEI as a Constitutional Voice for Public Services in EU Law and Part III The cost of loyalty the relationship between EU procurement and state aid legislation on social services and the Treaty rules on SGEI ending with a case study of Swedish systems of choice. Analyses are also provided on how the EU legislator engages in the Europeanisation of social services through EU procurement and state aid rules that have an ambiguous relationship to the Treaty framework on SGEI. Some explanation to this ambiguity is proposed by studying how the application of EU state aid rules could hinder the development of Swedish systems of choice liberalizing publicly funded elderly care and school education. Included are propositions on crucial but yet unsettled legal questions in particular what the legal meaning and

relevance of the notion of economic activity in EU market law are and which core elements characterize SGEI This book is therefore mainly aimed at legal academics and practitioners but may also be of interest to political scientists Caroline Wehlander studied at Ume University and holds the title of Doctor of Laws She lives and works in Sweden

**Procurement and Labour Rights** Maria Anna Corvaglia,2017-09-21 This book investigates patterns of fragmentation and coherence in the international regulatory architecture of public procurement In the context of the major international instruments of procurement regulation the book studies the achievement of social and labour policies the most controversial and problematic instrumental uses of public procurement practices This work offers an innovative comparative approach discussing the ways in which the different international instruments namely the EU Procurement Directives the WTO Agreement on Government Procurement the UNCITRAL Model Law and the World Bank s Procurement Framework are able to implement labour and social purposes and at the same time ensure a regulatory balance with the principles of efficiency and non discrimination Scholarly rigorous and timely this will be important reading for international trade lawyers and procurement practitioners

### **Discretion in EU Public Procurement Law** Sanja Bogojevic,Xavier Groussot,Jörgen

Hettne,2019-05-30 The EU public procurement regime has recently undergone an overhaul and now allows Member States and their contracting authorities to pursue strategic goals via public procurement including environmental and social objectives The extent to which such interests may be accommodated in the procurement process is ultimately determined by the broader legal context in which the EU public procurement regime exists which raises pressing questions regarding the scope and limits of Member States discretion This volume scrutinises these new legal acts particularly Directive 2014/24 EU focusing on discretion and engaging with questions central to the public procurement regime against the EU legal backdrop including internal market law and environment law as well as law beyond the EU
