**Regulation of Ca<sup>2+</sup>-ATPases, V-ATPases and F-ATPases** Sajal Chakraborti, Naranjan S Dhalla, 2015-12-10 The biological membranes of cellular organization enfold an important group of membrane proteins called the ATPases which are not only versatile in maintaining chemical gradient and electrical potential across the membrane but also bring metabolites necessary for cell metabolism and drive out toxins waste products and solutes that otherwise can curb cell functions ATPases are distributed virtually in all live forms starting from unicellular to multicellular and also in viruses There are different types of ATPases which differ in function and structure and in the type of ions they transport The three main types of the ion pump ATPase family are i P type ATPases that transport different ions across membranes and Ca<sup>2+</sup> ATPases belongs to this category ii F type ATPase in mitochondria chloroplasts and bacterial plasma membranes produce ATP using the proton gradient and iii V type ATPase catalyzes ATP hydrolysis to transport solutes and maintains acidic pH in organelles like lysosomes Genetic defects in either of the ATPases cause several diseases and a number of researches have demonstrated the involvement of the members of ATPases in the cell pathology and diseases thereby penetrating exciting new areas of our understanding In this book the authors summarize recent knowledge about the molecular mechanisms associated with Ca<sup>2+</sup> ATPase V ATPase and F ATPase in intracellular and extracellular Ca<sup>2+</sup> transport mitochondrial ATP synthase vesicular H transport and lysosomal pH regulation This book thereby bridges the gap between fundamental research and biomedical and pharmaceutical applications The book provides an informative resource to improve ATPase research and modern therapeutic approaches toward different life threatening diseases that are associated with dysregulation of the ATPases

**Fundamentals of Protein Structure and Function** Engelbert Buxbaum, 2015-11-27 This book serves as an introduction to protein structure and function Starting with their makeup from simple building blocks called amino acids the 3 dimensional structure of proteins is explained This leads to a discussion how misfolding of proteins causes diseases like cancer various encephalopathies or diabetes Enzymology and modern concepts of enzyme kinetics are then introduced taking into account the physiological pharmacological and medical significance of this often neglected topic This is followed by thorough coverage of h moglobin and myoglobin immunoproteins motor proteins and movement cell cell interactions molecular chaperones and chaperonins transport of proteins to various cell compartments and solute transport across biological membranes Proteins in the laboratory are also covered including a detailed description of the purification and determination of proteins as well as their characterisation for size and shape structure and molecular interactions The book emphasises the link between protein structure physiological function and medical significance This book can be used for graduate and advanced undergraduate classes covering protein structure and function and as an introductory text for researchers in protein biochemistry molecular and cell biology chemistry biophysics biomedicine and related courses About the author Dr Buxbaum is a biochemist with interest in enzymology and protein science He has been working on the

biochemistry of membrane transport proteins for nearly thirty years and has taught courses in biochemistry and biomedicine at several universities

**An Innovative Approach to Understanding and Treating Cancer: Targeting pH** Tomas Koltai, Stephan J. Reshkin, Salvador Harguindey, 2020-01-16 An Innovative Approach to Studying and Treating Cancer Targeting pH describes one of the few characteristics of cancer that is not shared by normal tissues the reversal or inversion of the pH gradient when intracellular pH becomes alkaline and extracellular pH becomes acid This is now recognized as one of the most selective and differential hallmarks of all cancer cells and tissues being the opposite of the condition found in normal tissues and a potential target in order to achieve either a stable disease or even regression with no toxicity The book discusses topics such as lactic acid and its transport system in the pH paradigm

mechanisms to decrease extra cellular pH and increase intracellular pH NHE 1 activity in cancer carbonic anhydrases vacuolar ATPase proton pump and the sodium bicarbonate cotransporter system Additionally it discusses complementary pharmacological interventions cellular acidification and extracellular alkalinization as a new and integral approach to cancer treatment Analyzes the mechanisms that lead to the inversion of pH gradient in cancer tissues Summarizes almost 100 years of research on pH inversion in cancer in one single source discussing the most relevant and updated researches in the field Proposes new efficient treatments against cancer using pH inversion mechanisms either with new drugs like proton transport inhibitors and proton pump inhibitors PTIs and PPIs or with repurposed drugs     *Approaches for Enhancing Abiotic Stress Tolerance in Plants* Mirza Hasanuzzaman,Kamrun Nahar,Masayuki Fujita,Hirosuke Oku,Tofazzal Islam,2019-01-10 Plants are frequently exposed to unfavorable and adverse environmental conditions known as abiotic stressors These factors can include salinity drought heat cold flooding heavy metals and UV radiation which pose serious threats to the sustainability of crop yields Since abiotic stresses are major constraints for crop production finding the approaches to enhance stress tolerance is crucial to increase crop production and increase food security This book discusses approaches to enhance abiotic stress tolerance in crop plants on a global scale Plants scientists and breeders will learn how to further mitigate plant responses and develop new crop varieties for the changing climate     **Journal of Cell Science** ,2002     Current Omics Advancement in Plant Abiotic Stress Biology Deepesh Bhatt,Manoj Nath,Saurabh Badoni,Rohit Joshi,2024-05-07 Applied Biotechnology Strategies to Combat Plant Abiotic Stress investigates the causal molecular factors underlying the respective mechanisms orchestrated by plants to help alleviate abiotic stress in which Although knowledge of abiotic stresses in crop plants and high throughput tools and biotechnologies is available in this book a systematic effort has been made for integrating omics interventions across major sorts of abiotic stresses with special emphasis to major food crops infused with detailed mechanistic understanding which would furthermore help contribute in dissecting the interdisciplinary areas of omics driven plant abiotic stress biology in a much better manner In 32 chapters Applied Biotechnology Strategies to Combat Plant Abiotic Stress focuses on the integration of multi OMICS biotechnologies in deciphering molecular intricacies of plant abiotic stress namely drought salt cold heat heavy metals in major C3 and C4 food crops Together with this the book provides updated knowledge of common and unique set of molecular intricacies playing a vital role in coping up severe abiotic stresses in plants deploying multi OMICS approaches This book is a valuable resource for early researchers senior academicians and scientists in the field of biotechnology biochemistry molecular biology researchers in agriculture and crops for human foods and all those who wish to broaden their knowledge in the allied field Describes biotechnological strategies to combat plant abiotic stress Covers the latest evidence based multipronged approaches in understanding omics perspective of stress tolerance Focuses on the integration of multi OMICS technologies in deciphering molecular intricacies of plant abiotic stress     *ATPases* A.G.
