The Bloomsbury Handbook of Religious Education in the Global South Yonah Hisbon Matemba,Bruce A.

Collet,2022-02-10 The Bloomsbury Handbook of Religious Education in the Global South presents new comparative perspectives on Religious Education RE across the Global South Including 23 chapters written by scholars from the Global North and South this is the first authoritative reference work on the subject The handbook is thematically organised into seven sections The first three sections deal with provision response to changes in contemporary society and decolonizing RE The next four sections explore young people and RE perspectives on teachers RE in higher education and finally challenges and opportunities for RE The term Global South is used here primarily to signify the deep economic divide with the Global North but the concept is also examined in historical geographical political social and cultural terms including the indelible influence of religion in all four broadly defined regions Exploring RE from local cross national as well as regional and sub regional perspectives the handbook examines RE from its diverse past present realities and envisioned future revealing not only tensions contestations injustices and inequalities of power but importantly how inclusive forms of RE can help solve these problems

Groupthink in Science David M. Allen,James W. Howell,2020-04-23 This book discusses one of the hottest topics in science today i e the concern over certain problematic practices within the scientific enterprise It raises questions and more importantly begins to supply answers about one particularly widespread phenomenon that sometimes impedes scientific progress group processes The book looks at many problematic manifestations of going along with the crowd that are adopted at the expense of truth Closely related is the concept of pathological altruism or altruism bias the tendency of scientists to bias their research in order to further the ideological or financial interests of an in group at the expense of both the interest of other groups as well as the truth The book challenges the widespread notion that science is invariably a benevolent benign process It defines the scientific enterprise in practice as opposed to in theory as a cultural system designed to produce factual knowledge In effect the book offers a broad and unique take on an important and incompletely explored subject research and academic discourse that sacrifices scientific objectivity and perhaps even the scientist s own ethical standards in order to further the goals of a particular group of researchers or reinforce their shared belief system or their own interests whether economic ideological or bureaucratic

The Superpower Myth Nancy Soderberg,2005-02-11 Are there limits to American power Drawing on eight years as a high ranking official in the Clinton Administration Nancy Soderberg takes you behind the scenes to examine how the president and his advisors responded to the challenge of shaping a new foreign policy for the post Cold War era She cites personal recollections recently declassified

documents and interviews with the principals involved to provide insight into the decision making process that all presidents face Soderberg contrasts Clinton's approach as it evolved from a shaky start to a carefully crafted blend of diplomacy force leadership and cooperation with Bush's embrace of the superpower myth which holds that America is powerful enough to bend the world to its will through unilateral force Soderberg demonstrates why military force alone is not always effective why allies and consensus building are crucial and how the current administration's faulty worldview has adversely affected our security From publisher description *Education* Gina Giuliano, 2006 Provides the latest information and statistics of education in the United States Covers primary elementary and secondary schools public vs private schooling national education goals student testing and achievement dropout rates at risk students home schooling school choice vouchers teacher supply public opinions about education violence and drug use in schools special education education of gifted children and more Myths and Realities Katharine Davies Samway, Denise McKeon, 2007 This second edition updates the myths the authors challenged in the first book as well as addressing new ones that have arisen since and discuss how teachers of ELLs can ensure that their students will fare well in the era of No Child Left Behind book cover **Economic Myths** Patrick Luciani, 2004 Appropriate for Economic Issues courses or as a supplement for Principles of Economics courses Improving on the distinct base laid down by the third edition *Economic Myths* Fourth Edition continues to teach economics by focusing on issues rather than theory Moving economics out of the classroom and effectively placing it within the context of the real world this book takes a stance on controversial economic issues inciting lively debate and analytic thinking in the classroom By dispelling economic illusions the text is the perfect complement to introductory economics textbooks encouraging students to reflect carefully on public policy and other economic issues that are confronted daily Topics covered range from minimum wage and pay equity to the environment and free trade Education Under the Security State David Gabbard, E. Wayne Ross, 2008 This highly acclaimed volume in the *Defending Public Schools* series is now available in paperback from Teachers College Press It is a practical necessary addition to the work of administrators teachers policymakers and parents as they negotiate the difficult path of how to best teach and educate today's children and youth Defending Public Schools: Education under the security state David Gabbard, E.
