## Nike Corporate Identity Guidelines:

Trust and Brand Management Hanna Górska-Warsewicz, 2024-12-23 Trust and Brand Management covers the main topics of heritage based corporate brand management and its relationship to external factors and performance. The benefits for readers of this book lie in several aspects: knowledge of corporate brand management, brand heritage and related concepts, theoretical and practical foundations of brand management and brand heritage, and empirically supported research on the relationship among brand heritage, brand management practices, antecedents and outcomes of heritage based corporate brand management. This book consists of two parts. The first part provides a literature review and theoretical and practical background on brand heritage, its antecedents and outcomes, brand management approaches and heritage based corporate brand management. The second part presents the results of an empirical study as structural equation modeling to establish the relationship among brand heritage, corporate brand management practices, antecedents, brand history, culture, identity and authenticity, and outcomes of heritage based corporate brand management, brand trust, brand equity and performance. In addition, the book includes 31 case studies of well known heritage brands presenting their history, marketing, communications development and positioning strategies. The benefit for managers is the presentation of terms and specific tools related to corporate brand management in the market and customer outcomes.

**Brands and Branding** Rita Clifton, 2009-04-01 With contributions from leading brand experts around the world, this valuable resource delineates the case for brands' financial value, social value, etc. and looks at what makes certain brands great. It covers best practices in branding and also looks at the future of brands in the age of globalization. Although the balance sheet may not even put a value on it, a company's brand or its portfolio of brands is its most valuable asset. For well known companies, it has been calculated that the brand can account for as much as 80 percent of their market value. This book argues that because of this and because of the power of not for profit brands like the Red Cross or Oxfam, all organisations should make the brand their central organising principle, guiding every decision and every action. As well as making the case for brands and examining the argument of the anti globalisation movement that brands are bullies which do harm, this second edition of *Brands and Branding* provides an expert review of best practice in branding, covering everything from brand positioning to brand protection, visual and verbal identity and brand communications. Lastly, the third part of the book looks at trends in branding, branding in Asia especially in China and India, brands in a digital world and the future for brands. Written by 19 experts in the field, *Brands and Branding* sets out to provide a better understanding of the role and importance of brands as well as a wealth of insights into how one builds and sustains a successful brand.
