

# O-P-Q-R-S-T

- **Onset:** The onset of pain can provide important clues to its origin. What was the casualty doing when the pain started? Did the pain come on gradually or suddenly?
- **Provocation:** What makes the pain worse and what relieves it – may be rest, position or medication.
- **Quality:** Ask the casualty to describe the pain in their own words – is it sharp, dull, constant, coming and going?
- **Radiation:** Does the pain spread to any other regions of the body?
- **Severity:** How severe is the pain? Use a verbal pain score to rate the pain. For adults the start point is 0 i.e no pain and end point is 10 – worst pain imaginable.
- **Timing:** How long has the casualty had the pain? Is it getting worse/better/staying the same over time?
