and sustained is far from evident The question of how to turn research into educational improvement is discussed here in the

context of learning and teaching hindered by poverty and social injustice In the first part of the book four teams of

researchers use different methodologies while analysing the same corpus of data collected in a South African mathematics

classroom In the second part each of these teams makes a specific proposal about what can be done and how so that its

research generated insights have a tangible beneficial impact on what is happening in mathematical classrooms Combining

two discourses that of researchers speaking to one another and that of researchers communicating their insights to those

responsible for educational practice the book deals with the perennial question of communication between those who study
