Groan in the Throat Vol. 1 Tony Baugh, 2021-08-05 Provocatively explaining the political and social phenomenon of white supremacy as a religion and providing a theology of redemption for disparaged communities affected by it, this book is a collection of personal and academic essays that challenge popular notions of American exceptionalism. A little bit of everything, a mixtape in the tradition of DJ Clue, episodic and rhapsodic, lifting a panoply of voices in an unexpected way, it wrestles with theology and philosophy alike, blending poetry with narrative nonfiction and memoir. It is a creation of a new and expressive literary experience that is as tragic and triumphant as the Black experience is in America, a groaning that cannot be uttered.

Dear Parents, 1966 Partnering With Parents in Elementary School Math Hilary Kreisberg, Matthew L. Beyranevand, 2021-02-15 How to build productive relationships in math education. I wasn't taught this way. I can't help my child. These are common refrains from today's parents and guardians who are often overwhelmed, confused, worried, and frustrated about how to best support their children with what they see as the new math. The problem has been compounded by the shift to more distance learning in response to a global pandemic. *Partnering With Parents in Elementary School Math* provides educators with long overdue guidance on

how to productively partner and communicate with families about their children's mathematics learning. It includes reproducible surveys, letters, and planning documents that can be used to improve the home-school relationship, which in turn helps students, parents, teachers, and education leaders alike. Readers will find guidance on how to understand and empathize with what fuels parents' anxieties and concerns, align as a school and set parents' expectations about what math instruction their children will experience, and how it will help them. Communicate clearly and productively with parents about their students' progress, strengths, and needs in math. Run informative and fun family events to support homework. Coach parents to portray a productive disposition about math in front of their children. Educators, families, and students are best served when proactive, productive, and healthy relationships have been developed with each other and with the realities of today's math education. This guide shows how these relationships can be built.
