**Defending Assessment Security in a Digital World** Phillip Dawson, 2020-10-26 Defending Assessment Security in a Digital World explores the phenomenon of e cheating and identifies ways to bolster assessment to ensure that it is secured against threats posed by technology Taking a multi disciplinary approach the book develops the concept of assessment security through research from cybersecurity game studies artificial

intelligence and surveillance studies. Throughout there is a rigorous examination of the ways people cheat in different contexts and the effectiveness of different approaches at stopping cheating. This evidence informs the development of standards and metrics for assessment security and ways that assessment design can help address e cheating. Its new concept of assessment security both complements and challenges traditional notions of academic integrity. By focusing on proactive principles based approaches the book equips educators, technologists and policymakers to address both current e cheating as well as future threats.

**Applying Metalytics to Measure Customer Experience in the Metaverse** Bathla, Devesh, Singh, Amandeep, 2022-06-24. In many ways the appearance of the metaverse is an unparalleled progression. A number of new technologies have come together to enable its vision. Augmented reality AR and virtual reality VR headsets have become cheaper and more powerful improving the user experience. Blockchain has enabled digital currencies and NFTs. The new methods to transact and own digital goods are allowing creators to monetize their activities through tokens. In addition to monetization and as a means to exchange value token holders can also participate in the platform's governance e.g. vote on decisions. This democratic ownership economy coupled with the possibility of interoperability could unlock immense economic opportunities whereby digital goods and services are no longer captive to a singular gaming platform or brand. As the world steps into the metaverse it is imperative to spark conversations with all objects and those interacting within the next dimension.

Applying Metalytics to Measure Customer Experience in the Metaverse introduces metalytics a new perspective on analytics for the new dimension of spatial and immersive Web 3.0. It presents the new conversations in the elements of a new digital age converging at a large scale. Covering topics such as big data analytics, financial services and network analysis this premier reference source is an essential resource for business leaders and executives, IT managers, entrepreneurs, financial specialists, consultants, statisticians, marketers, government officials, students and educators of higher education, librarians, researchers and academicians.
