**Rethinking Writing Education in the Age of Generative AI** Chaoran Wang, Zhongfeng Tian, 2025-05-23 Bringing together leading scholars and practitioners Rethinking Writing Education in the Age of Generative AI offers a timely exploration of pressing issues in writing pedagogies within an increasingly AI mediated educational landscape. From conceptual and empirical work to theory guided praxis the book situates the challenges we face today within the historical evolution of writing education and our evolving relationship with AI technologies. Covering a range of contexts such as L2 multilingual writing first year writing writing centers and writing program administration and faculty development the book examines various AI informed writing pedagogies and practices. Drawing on interdisciplinary perspectives from writing studies education and applied linguistics the book bridges theory and practice to address critical questions of innovation ethics and equity in AI supported teaching. This book is essential for writing educators and researchers looking to leverage AIs to facilitate the teaching and learning of writing in critical and transformative ways.

**Your Data Will Be Used Against You** Andrew Guthrie Ferguson, 2026-03-17 Interrogates how digital self surveillance can be turned against us by police prosecutors and political whims. For consumers living in a digitally connected world smart technologies have built an inescapable trap of digital self surveillance. Smart cars smart homes smart watches and smart medical devices track our most private activities and intimate patterns. While these devices allow users to receive personal insights by monitoring their every move that data can be accessed by police and prosecutors looking to find incriminating clues. Digital technology exposes everyone everywhere all at once and we have few laws to regulate it. In Your Data Will Be Used Against You Andrew Guthrie Ferguson warns us of how the rise of sensor driven technology social media monitoring and artificial intelligence can be weaponized against democratic values and personal freedoms. At the same time that data will solve crimes radically transforming how criminal cases are prosecuted Ferguson explores how this proliferation of private data in combination with public surveillance networks promises new ways to solve previously unsolvable crimes but also leaves us vulnerable to governmental overreach and abuse. He argues for legal interventions that address the threat of digital self surveillance and provides concrete suggestions about how legislators judges and communities should respond. As consumers citizens and potential subjects of surveillance the questions in this book must be confronted now before the trap of surveillance captures us completely. Providing a stark warning of the dangers of digital self surveillance Your Data Will be Used Against You is a defense of civil liberties against the growing threat of data driven policing.
