**Life Takes Wings** Lynn Rippelmeyer, 2022-02-01 A true story of a woman s drive and intensity told with humility grace and humor Life Takes Wings is a great American flying story Deborah Douglas author of *American Women and Flight* In Life Takes Wings Captain Lynn Rippelmeyer soars with inspiration from a starry eyed farm girl gazing at the sky to flight attendant to first female pilot of the revolutionary Boeing 747 More than just a story of one woman s love affair with the skies Life Takes Wings combines lessons in tenacity humility humor perseverance and partnership with the exhilaration of defying social norms and the rewards of being true to oneself Inspired to become a commercial airline pilot in an age when it was not an option for girls serendipitous relationships lead Lynn to her first flying lessons in a seaplane then to becoming flight instructor and charter pilot while also working as a flight attendant Perceived as being incapable of flying women were relegated to the cabin Ignoring the pilots negative comments Lynn became a number of aviation s female firsts member of first all female commercial airline crew first flight attendant to pilot and first female pilot of the Boeing 747 Through laughter and tears Life Takes Wings shows the sky is no limit for those who follow their dreams Captain Rippelmeyer s book is one of the best chronicles of a flying life that I have ever read She meets turbulence with determination and fortitude but with a positive approach and a marvelous sense of humor which seems to be rare these days Jacqueline Boyd PhD chair Amelia Earhart Memorial Scholarship Fund and 99s 2020 recipient of the Award of Achievement for Contributions to Aviation

*The Hidden Power of Smell* Paul A. Moore, 2015-08-27 The main purpose of the book is to provide insight into an area that humans often take for granted There are wonderful and exciting stories of organisms using chemical signals as a basis of a sophisticated communication system In many instances chemical signals can provide more detailed and accurate information than any other mode of communication yet this world is hidden from us because of our focus on visual and auditory signals Although we have a diversity of senses available to us humans are primarily auditory and visual animals These stimuli are sent to the more cognitive areas of our brain where they are immediately processed for information We use sounds to communicate and music to excite or soothe us Our vision provides us with communication entertainment and information about our world Even though our world is dominated by other stimulus energies we have chosen in an evolutionary sense either auditory or visual signals to carry our most important

information This is not the case for most other organisms Chemical signals mediated through the sense of smell and taste are typically more important and are used more often than other sensory signals The world of communication using chemicals is an alien world for us We are unaware of how important chemical signals are to other organisms and we often overlook the influence of chemical signals in our own life Part of this na vet about chemical signals is due to our cultural focus on visual and auditory signals but a larger part of our collective ignorance is the lack of information about chemical communication in both popular and scientific writings The popular press and popular writings virtually ignore the chemical senses especially in regard to their role or influence for humans and our human culture Academic books and textbooks are no better
