## Roblox Games Near Me:

**Tokens** Rachel O'Dwyer, 2025-09-23 Longlisted for the Financial Times Schroders Business Book of the Year Award 2023  
BEST BOOK OF THE YEAR GQ Los Angeles Times Wired The essential guide to this new landscape of NFTs Web3 Crypto and DAOs and a warning of the political consequences of what happens when platform capitalism comes for the money in your pocket Wherever you look money is being replaced by tokens Digital platforms are issuing new kinds of money like things phone credit shares gift vouchers game tokens customer data the list goes on But what does it mean when online platforms become the new banks What new types of control and discrimination emerge when money is tied to specific apps or actions politics or identities Tokens opens up this new and expanding world Exploring the history of extra monetary economies Rachel O Dwyer shows that private and grassroots tokens have always haunted the real economy But as the large tech platforms issue new money like instruments tokens are suddenly everywhere Amazon's Turk workers are getting paid in gift cards Online streamers trade in wishlists Foreign remittances are sent via phone credit Bitcoin gift cards NFTs customer data and game tokens are the new money in an evolving economy It is a development challenging the balance of power between online empires and the state Tokens may offer a flexible even subversive route to compensation But for the platforms themselves they can be a means of amassing frightening new powers An essential read for anyone concerned with digital money inequality and the future of the economy [Infrastructures of Reality: Metaverse Stories, Spaces, Bodies](#)

Chris Hesselbein, Paolo Bory, 2025-08-09 This open access book focuses on two dimensions of the development of the metaverse that are crucial to reality namely spatiality and embodiment Metaversal technologies are thought to fundamentally affect both our spaces and bodies which are two central aspects of the constitution of social reality Both spatiality and embodiment are core elements of world making that are being pulled into the ambit of metaversal projects On the one hand metaversal technologies are profoundly spatial in the sense that they render space in virtual form or overlay digital layers onto pre-existing physical spaces On the other hand metaversal technologies are directly geared towards the body in that they not only seek to extend or expand our embodied senses and emplace our bodies in virtual spaces but they also seek to capture their behaviours and actions on a far more granular level This can create new opportunities in terms of work social interaction and leisure but can also open our bodies up to new tech driven interventions and control Whether in the form of VR or AR such technologies not only reproduce space but also rely on making spaces more legible and open to automated interventions Taken together the metaversification of spaces and bodies gives rise to crucial questions about the goals and implications of metaversal developments by large technology companies and about the relationship between the developments of the metaverse and AI systems Drawing on our combined background and expertise in Science and Technology Studies and the History of Media and Communication we critically analyse the development of metaversal technologies and platforms by discussing a broad set of developments and examples from a wide range of technology and
