to herald a world in which the crippling burdens of anxiety can be left behind The digital revolution promises a brave new  
world where individuals communities and organizations can at last take control of the future anticipating designing and  
commanding the future possibly even with mathematical exactitude Yet paradoxically algorithms have unleashed widespread  
fears and forebodings about the impact of digital technologies Whether it's worries about unemployment distress about social  
media's harmful effects on teenagers or the fear of intrusive digital surveillance we live in an age of turbo charged anxiety  
where the prophecies of algorithms are increasingly enmeshed with fundamental disruption and anxieties about the future In  
this book Anthony Elliott examines how machine learning algorithms are not only transforming global institutions but also  
rewriting our personal lives He tells this story through a wide ranging analysis which takes in ChatGPT Amazon the  
Metaverse Martin Ford Netflix Uber Bernard Stiegler Squid Game Kate Crawford LaMDA Byung Chul Han autonomous  
drones Jean Baudrillard and the automation of warfare Questioning why people often assume that they need to adopt new  
technologies in order to lead fulfilling lives Elliott argues that people may be as much entranced as inspired by their  
outsourcing of personal decision making to smart machines     **The Ultimate Guide** Anthony Wright,Lecturer in Political
