AI-Mediated Language Education in the Metaverse Era Yu-Ju Lan, Grace Yue Qi, Dorothy Chun, 2025-10-13 This book provides open discussions and dialogues around the latest research and development on applying AI and ubiquitous technologies into various language learning contexts. Living in the Metaverse era arguably a turning point in the evolution of the Internet it is vital for researchers and practitioners to rethink and reconsider human and AI relationships in transforming the way we teach learn and live in everyday life. Reinders et al 2022 amongst Computer Assisted Language Learning CALL researchers have emphasised the need to conduct more research on language learning in the classroom and beyond that makes real connections with what language learners do for their learning today. More importantly language educators must find ways to support language learning in this new era. What is urgently needed is a consolidation and synthesis of theoretical foundations, visions and the latest research findings and practices on the integration of AI and ubiquitous technologies and language education from diverse perspectives. This book comprising of contributions regarding contextualised AI mediated language learning and teaching provides researchers, practitioners and teacher educators with an opportunity to closely engage in research informed practices and intellectual dialogues on potential opportunities and challenges in the Metaverse era. It also helps to facilitate the development of equitable, sustainable and just practices for the diversity of language learners today.

The Metaverse Matthew Ball, 2024-07-23 From the leading theorist of the Metaverse comes the eagerly anticipated revised and updated account of the next internet what the Metaverse is what it will take to build it and what it means for all of us. A Hudson Booksellers Amazon Guardian Financial Times Economist and ByteDance Toutiao Best Book of the Year. In this substantially revised and updated edition of his internationally best selling book, pioneering theorist and entrepreneur Matthew Ball goes beyond the hype cycle to present a definitive account of the future of the internet. The Metaverse according to Ball's industry shaping definition is a persistent and interconnected network of 3D virtual worlds that will eventually serve as the gateway to most online experiences and underpin much of the physical world. As Ball recounts the Metaverse is a thirty year old term and the core ideas and technologies behind it have been in development for nearly a century. Only recently however did this fantastical concept begin to leap from the pages of science fiction and depths of national research labs to the forefront of consumer technology, industrial engineering, healthcare, education, dating and more. From the history of video games and virtual reality to proto metaverses such as Second Life, Fortnite and Roblox to Generative AI and the groundbreaking films and television series of the Walt Disney Company, Ball points out that the Metaverse is already emerging around us and doesn't require a headset. Still there are many breakthroughs required to fully realize the Metaverse and he describes each in approachable but expert detail. Ball also lays out how governmental policy, the philosophy of Big Tech leaders, artificial general intelligence, economics and human rights will shape the development of the Metaverse. Famous for his ability to bring clarity to complex and misunderstood topics, Ball demonstrates that the race to
