*Hubris Maximus* Faiz Siddiqui, 2025-04-22 The rise fall and revival of the Caesar of Silicon Valley Elon Musk famously leads his companies from a bully pulpit cutting through red tape whenever possible with little regard for the fallout Musk s approach to business and politics is truly singular he alternately seems to be either in complete command or on the verge of a meltdown and many in his orbit have had their lives upended by buying into his utopian vision From the chaotic launch of the Tesla Cybertruck to his decision to reshape Twitter into X as part of his self proclaimed mission to defeat the woke mind virus Musk is seemingly drawn to public controversy yet he has emerged from these turbulent moments more influential and

powerful than ever Hubris Maximus offers an unprecedented insight into the motives and mindset that have driven Musk's stratospheric rise to power In this cautionary tale about the pitfalls of magnetic leaders Washington Post journalist Faiz Siddiqui offers a gripping portrait of a uniquely messy and lucrative period in Musk's career one which has seen him ascend into a key role in Trump's administration

COVID-19: Food System Frailties and Opportunities Claire Kremen, Elliot Berry, Rachel Bezner Kerr, Patrick Meyfroidt, Ivette Perfecto, Todd Rosenstock, José Antonio Teixeira, Hannah Wittman, 2023-11-21

The global coronavirus pandemic is revealing major weaknesses inequities and system wide risks in global food systems giving renewed urgency to foster pathways to greater food system sustainability and resilience Due to rising unemployment supply chain disruptions and other responses to the pandemic such as disruptions to social assistance programs in some countries predictions suggest a near doubling of food insecurity globally Nutritional changes are also occurring as food availability and access changes leading to substitution of dry canned or processed foods for healthier fresh ingredients for some communities and the reverse for others These food security and nutritional changes are likely to be as impactful on human health as the virus itself As a system wide shock the pandemic reveals weaknesses of global supply chains The media highlighted empty supermarket shelves alongside food dumping in situations where producers locked into disappearing food service outlets were unable to access new markets Farmers with long standing reliance on migrant agricultural labor that can no longer travel across international borders under lockdown struggle to access support for the upcoming harvest season The pandemic highlights well known inequities for marginalized food systems employees as essential workers are exposed to greater risks of contracting the virus in food processing agricultural and grocery store settings but have little choice in accepting these conditions in order to keep these low paying jobs The pandemic reinforces another well known food system inequity marginalized and impoverished minorities often suffer from diet related diseases i.e cardiovascular diseases diabetes and or malnutrition that place them at greater risk of morbidity and mortality from the coronavirus Lockdowns and border closures are reducing economic opportunities such as day labor and agricultural markets in some regions such as much of Africa ensuing risks of food and nutrition insecurity for vast segments of the population threaten to set back development increase social conflict and catalyze migration Finally the current pandemic shines a spotlight on the systemic risk of infectious diseases to emerge and become globalized through local bushmeat markets and international wildlife trade and how wildlife hunting and trade is influenced by land use changes including by industrial agriculture At the same time adaptive responses to the coronavirus illustrate how more resilient and sustainable food systems could evolve going forward To avoid supply chain disruptions communities are increasing their reliance on local food systems including an increase in urban gardening and community supported agriculture programs Small scale farmers are innovating to connect with buyers and with each other including through new online marketing initiatives Entrepreneurs are identifying foods that would otherwise be wasted and directing them to food banks Retailers and wholesalers are re

configuring their distribution networks to shift food to where it is needed most Food pantries local producers and food businesses are also collaborating with municipal governments to address food security gaps arising from COVID 19 impacts

have suggested that these uprisings were significantly influenced and organised by Twitter and subsequently referred to them as Twitter Revolution Other authors have strongly opposed this idea and attributed it to self deception in the light of marvellous inventions of the Western World They have suggested Twitter was predominantly used as an information sharing network In an effort to contribute data to this debate this dissertation analyses tweet content from three different observation periods two tweet datasets were collected from other academics and third one was crawled from the Twitter API this process made use of the crawling tool cURL and the database software mongoDB The combined tweet dataset contained about 1 9 million tweets out of which a sample of 1945 tweets was drawn This sample was then evaluated in a quantitative content analysis according to a coding manual These codes were entered into the statistical analysis software SPSS in which they were also processed This study found that in the context of these uprisings Twitter was indeed used more as an information sharing tool and only to a relatively small fraction for organisational purposes This result does not negate the possibility of a mobilising effect of that small fraction A further central result is that almost every second tweet contained a hyperlink and that most of these lead to visual stimuli
