The American Garden ,1885 Rafting the Amazon François Odendaal,1992 From their rise in the high Andes of Peru the two sister rivers Urubamba and Apurimac join to form the Amazon the world's largest and most powerful river crossing an entire continent in search of the sea This book traces François Odendaal's three expeditions to raft this extraordinary river It is a story of adventure courage and personal experience as well as a geographical environmental and historical celebration of the continent of South America Tax Transfer Pricing Andrea Musselli,2022-09-15T00:00:00+02:00 The book pays attention to the tax treatment of transfer pricing in a single perspective of analysis since the most important principles the arm's length ALP i.e. conditions that independent parties would share and the sale country are agreed worldwide They must be applied in the same way regardless of the economic sector or industry A country survey overlooks the most important issue of the fiscal problem that is the ability to project a unitary policy in compliance with the ALP or with the sale country principle and that should be audited by one sole only theoretically existing tax authority The practical part and examples disclose how rules should be have been applied how legal proceedings can arise arose regarding their application how they were decided if litigation truly occurred and finally the author's motivated opinion with special focus on which is the breaking point of a specific analysis The term breaking point is used to explain which can be the factual and or the interpretative change that is able to modify such analysis and thus the solution Extract from the preface of prof Reuven Avi Yonah this book is a must read for any serious student of the topic and an important contribution to understanding how the ALP is applied today as well as to how it should be applied It is an invaluable contribution and should be read widely by both tax lawyers and accountants and by tax policy makers
