targets and corresponding therapeutics There are assumptions that a single bioactive compound is unable to take the therapeutic effect instead it is the combination of multiple ingredients in the herbal recipe that restores the neurological functions of the patients This Research Topic aims to collect original research reviews and meta analyses to demonstrate the therapeutic effects of traditional complementary and integrative medicine on neurodegenerative diseases stroke and vertigo and to unravel their underlying mechanisms The goal aligns with the World Health Organization s strategic plan for future development seeking to validate and expand the understanding of TCIM s role in managing these complex conditions By exploring the synergistic effects of multiple ingredients in herbal recipes this research aims to identify new therapeutic targets and develop effective treatments that restore neurological functions To gather further insights into the therapeutic potential of traditional complementary and integrative medicine we welcome articles addressing but not limited to the following themes Clinical studies assessing the efficacy of TCIM including herbal recipes plant derivatives and other natural products in managing neurodegenerative diseases stroke and vertigo Basic original research on the underlying mechanisms of TCIM in managing these conditions Systematic reviews or meta analyses on the efficacy of specific recipes or individual bioactive compounds and their mechanisms In vitro and in vivo studies contributing to the understanding of TCIM s mechanisms in managing neurodegenerative diseases stroke and vertigo Please note All the manuscripts submitted to the collection will need to fully comply with the Four Pillars of Best Practice in Ethnopharmacology you can freely download the full version here Please self assess your MS using the ConPhyMP tool and follow the standards established in the ConPhyMP statement Front Pharmacol 13 953205 Please note the traditional context including the primary background and modern uses with supporting references must be included in the manuscript introduction Purely in silico approaches using complex mixtures extracts are generally not considered You need to check your MS using <https://ga.online.org/best-practice> and include a PDF in your resubmissions with the relevant tables of the tool filled 1 and 2a cf Front Pharmacol 13 953205 <https://doi.org/10.3389/fphar.2022.953205> **The Physician and Sportsmedicine**, 1983 **Study Guide for the Core**
