**Green Human Resource Management in Financial Institutions** Kirandeep Kaur Bajwa, 2025-10-06 This book explores the intersection of human resource management and environmental sustainability within the dynamic context of the financial sector. As banks and financial services navigate increasing regulatory pressure and stakeholder expectations related to climate change and ESG performance, this book emphasizes the role of human capital in driving sustainable change. Drawing on global practices and Indian perspectives, the book offers a comprehensive view of how Green Human Resource Management strategies ranging from eco-friendly recruitment to green performance management can enhance environmental outcomes, improve organizational efficiency, and strengthen employee engagement. With practical frameworks, real-world case studies, and forward-looking insights, this volume is a vital resource for HR leaders, banking professionals, researchers, and students seeking to align people practices with sustainability goals.

**TRENDS AND PREFERENCES: A STUDY ON ELECTRIC TWO WHEELER ADOPTION IN THE DELTAIC REGIONS OF TAMILNADU** Dr. J.

Selva, 2024-08-15 The world is focusing attention on emerging from erratic weather, mitigation of pollution, rapid depletion of fossil fuels, and the need to ameliorate standard of living organisms. In this aspect, many countries have undertaken new steps to control naturally available renewable resources and using it to create a pollution-free environment. The transportation segment alone estimates for about one-third of total fossil fuel consumption, and road transportation accounts for nearly 80% of consumption. In the area of electric mobility, the automotive industry is at the cusp of a paradigm shift from internal combustion engine vehicles (ICEVs). The shift to electric mobility has become necessary on the basis of fast depletion of fossil fuels, high cost of energy, effect of transportation on the environment, and attention about climate change. NEMMP 2020-2012 The previous century has been the epoch of ICE Vehicles mainly on account of the ease of use, large quantity of availability, and low price of fossil fuels. Bhale, 2015

**Handbook on New Paradigms in Smart Charging for E-Mobility** Abhishek Kumar, Ramesh C. Bansal, Praveen Kumar, Xiangning He, 2025-03-21 Handbook on New Paradigms in Smart Charging for E-Mobility: Global Trends, Policies, and Practices provides a complete package for understanding and developing smart chargers for e-mobility applications. It discusses various concepts required for developing charging infrastructure and usage of different kinds of storage technologies, power electronics, converters, controllers, communication requirements, grid infrastructure, sustainable technologies, policy frameworks, and all other related crucial aspects of E-mobility. Each part of the book covers a subdomain of e-mobility, beginning with an introductory chapter reviewing existing literature. The subsequent chapters are arranged to each follow the previous one. Other available books focus on specific technical subdomains of e-mobility, but none provides the wider outlook to meet the requirements of all audiences. This book uniquely brings together topics that are not otherwise easily accessible or available to these audiences. This book will be beneficial for engineers, scientists, and researchers, providing them with a comprehensive standard benchmark work to explore the evolving aspects of

charging infrastructure for e mobility Further it will also help policymakers practitioners and government entities formulate policies for successful implementations of e motility for their masses The techno socio economic focus will serve as standard literature for all Takes a modular approach with each module catering to a different sub domain of e mobility Includes standalone chapters that cover out of the box work related to e mobility Presents the latest advances and detailed technical descriptions of smart charging infrastructures

**Smart Robust Operation and Trading of Integrated Energy Systems with Low Pollution Goals** Kaiping Qu,Yue Zhou,Xin Fang,Shuli Wen,Shiwei Xie,2024-09-23 To mitigate two major environmental concerns of global warming and air pollution renewable energies with uncertainty are increasingly deployed in power systems which challenge the system s secure operation A single system usually has limited adjusting ability In contrast integrated energy systems such as electricity gas electricity traffic electricity heat and transmission distribution coordinated systems enhance the regulating ability of renewable energy accommodation and environmental protection The operation of integrated energy systems will meet three essential requirements low pollution attribute robustness and cooperativity However the diversity of uncertainty conditions the complementarity of new energy accommodation among systems the conflict of interest between systems and the dispatch autonomy of systems challenge the requirements mentioned above The main goal of this Research Topic includes 1 Propose more effective trading mechanisms or control strategies for carbon and air pollutant emissions 2 Fully use complementary effects between electric power natural gas heat hydrogen and traffic systems 3 Realize the coordinated operation of integrated energy systems with limited information interaction and ensured dispatch autonomy 4 Improve the robustness of integrated energy systems under diversified uncertainty conditions 5 Apply data based reinforcement learning methods for the dynamic decision of smart integrated energy systems under complex environments

**Economic Bulletin** ,2016      The Urban Electric Vehicle Organisation for Economic Co-operation and Development,International Energy Agency,1992      **Successful Pathways to Carbon Neutrality and Climate Sustainability** Henry K. H. Wang,2025-11-28 This book unpacks the institutional organizational and management challenges in pursuing carbon neutrality and climate sustainability for key countries and leading companies globally By providing real life cases across different countries and business sectors the book outlines potential policy implications and strategic pathways for countries and companies to consider in their journey towards achieving successful carbon neutrality and climate sustainability management It also explores important new global developments in clean energy renewables sustainable transport green finance carbon solutions and new green innovations This book will appeal to anyone interested to learn more about developing successful strategies and management action plans to achieve their carbon neutrality goals and climate sustainability targets for their countries and companies globally
