Roadmapping Extended Reality Mariano Alcañiz, Marco Sacco, Jolanda G. Tromp, 2022-08-23 ROADMAPPING

EXTENDED REALITY This book offers a comprehensive overview of the technological aspects of Extended Realities XR and discusses the main challenges and future directions in the field. This book is important and timely. XR technologies have overcome the 3 main aspects that were holding it back from mainstream adoption: cost, cables and size. However, there are many aspects of XR technologies that are now going to be explored and developed that still need urgent research in terms of security, privacy, health and safety, long term effects, addiction risks and age related developmental concerns. The aim of the book is to inform all readers of these open issues and challenges. There are currently a great number of interdisciplinary researchers and developers working in the XR R&D field. Recently, XR technologies moved from the Gartner Hype Cycle onto the Plateau of Productivity on the Gartner Hype Cycle, signaling that the fundamental XR technologies are now deemed mature technologies and ready for deployment in a wide variety of application areas. Corroborated by the fact that XR technologies are part of the future Metaverse, a concept that went rapidly mainstream during the time of writing of this book. Roadmapping Extended Reality is divided into two parts: 1. fundamentals and 2. applications. The first part covers the main technological aspects of XR. The chapters in this section review and discuss relevant fundamental concepts of XR, the actual state of the art and future challenges. The second part of the book focuses on covering a wide range of applications of XR, including a future roadmap. All in all, the book offers a snapshot of the state of the art in XR and addresses the needs of a multidisciplinary audience working in both academia and the industry, as well as stakeholders at government agencies and non-profit organizations.

Audience: This book is aimed at academic and industrial developers exploring and developing applications in the XR, VR, AR, AI, smart IoT, 4th Industrial Revolution space, including those that are solving technology requirements, human factors evaluation, methodology, advances and ROI investigations.

Software Engineering, Artificial Intelligence, Networking and Parallel/Distributed Computing Roger Lee, 2022-11-18

This book presents scientific results of the 23rd ACIS International Summer Virtual Conference on Software Engineering, Artificial Intelligence, Networking and Parallel Distributed Computing (SNPD2022 Summer), which was held on July 4-6, 2022, at Kyoto City, Japan. The aim of this conference was to bring together researchers and scientists, businessmen and entrepreneurs, teachers, engineers, computer users and students to discuss the numerous fields of computer science and to share their experiences and exchange new ideas and information in a meaningful way. Research results about all aspects, theory, applications and tools of computer and information science and to discuss the practical challenges encountered along the way and the solutions adopted to solve them. The conference organizers selected the best papers from those papers accepted for presentation at the workshop. The papers were chosen based on review scores submitted by members of the program committee and underwent further rigorous rounds of review. From this second round of review, 15 of most promising papers are then published in this Springer

The Metaverse and Career Development K. G. Priyashantha, 2025-10-14 This book explores how the Metaverse may be applied to career development practices. Beginning with a systematic review of empirical literature to foreground tested Metaverse applications in both workplace and educational settings, the book provides a framework for discussing possible Metaverse applications through five key career stages: Growth, exploration, establishment, maintenance, and disengagement. It then provides best practices, policy considerations, and implementation guidelines for organizations and educational institutions. Ethical considerations including privacy, data security, digital divide, and psychological impacts of prolonged immersion in virtual environments are also discussed. This book will interest scholars of digital human resource management, human resource development, and career management. Its practical suggestions may also interest HR practitioners and policymakers.

Houghton, Emma L. Murray, 2024-12-10 Management Fourth Edition introduces students to the planning organizing leading and controlling functions of management with an emphasis on how managers can cultivate an entrepreneurial mindset. The text includes 34 case studies profiling a wide range of companies including The Progressive Corporation, Catch Release, and Sephora. Authors Christopher P. Neck, Jeffery D. Houghton, and Emma L. Murray use a variety of examples, applications, and insights from real world managers to help students develop the knowledge, mindset, and skills they need to succeed in today's fast paced dynamic workplace.

Regulating the Metaverse Ignas Kalpokas, Julija Kalpokienė, 2023-01-26 The metaverse seems to be on everybody's lips and yet very few people can actually explain what it means or why it is important. This book aims to fill the gap from an interdisciplinary perspective informed by law and media and communications studies. Going beyond the optimism emanating from technology companies and venture capitalists, the authors critically evaluate the antecedents and the building blocks of the metaverse, the design and regulatory challenges that need to be solved, and commercial opportunities that are yet to be fully realised. While the metaverse is poised to open new possibilities and perspectives, it will also be a dangerous place, one ripe with threats ranging from disinformation to intellectual property theft to sexual harassment. Hence the book offers a useful guide to the legal and political governance issues ahead while also contextualising them within the broader domain of governance and regulation of digital technologies.
