**The Glycemic Load Diet Guide: With High Fiber: High Protein: Complex Carbs** Sarah Chastain, 2014-05-12 Do you want to lose weight and keep it off Increase your energy levels If so eating the low GI High fiber high protein with With Points way could be the answer The glycemic index diet is not a true low carbohydrate diet because you don t have to count carbohydrates carbs Nor is it a low fat diet It also doesn t require you to reduce portion sizes or count calories For the same you will find selected low carb low gi recipes If you are looking for a structured diet that tells you exactly what types of foods to eat how much and when Weight Watchers might not work for you The ability to choose anything you want to eat may prove too tempting for some It is completely possible to use all your Points on less than nutritious foods unless you consciously commit to making healthier decisions They advertise trying to convince overweight people that they can lose weight without sacrificing the foods they love However this is only achieved by allowing dieters to have calories that should be consumed on healthy food with very small portions of potentially unhealthy food This strategy gives the dieter a false sense of the real nutritional changes they need to make in their lives for long term success If one seriously wants to lose weight and keep it off they need to think more comprehensively about the foods they eat without the confusing points scheme With the old points system you could use your points anyway you like But we now

know if you use your points wisely by eating foods rich in protein and fiber these foods fill you up keep hunger at bay and help you lose weight in a healthier and more nutritious way lose weight not muscles Proteins Proteins are the basic building blocks of every cell in your body They are large compounds made of amino acids In order to build repair or rebuild enzymes and muscles your body needs amino acids that can only be derived from protein Protein is essential for weight loss because you lose muscle mass first when you diet not fat High Fiber Diet Weight Control Wonder One of the best side effects of eating a high fiber diet is that you may find it easier to maintain or even lose weight According to the Harvard School of Public Health most Americans get only 15 grams of dietary fiber a day when they should be getting anywhere from 20 to more than 30 grams *The Glycemic Index Diet Guide With Low Gi 195 Recipes Cookbook* Davie Baker,2014-05-10 The Glycemic Index Diet Guide With Low Gi Breakfast Soup Salad Baked Light Meal Chicken Beef Sea Food Desert Smoothies 195 Recipes Cookbook Do you want improve your overall good health Reduce food cravings Reduce your risk of cancer heart disease and diabetes Lower your cholesterol If so eating the low GI way could be the answer All the dishes contain at least one low GI food which will lower the overall GI count Most people following the low GI diet should lose on average 2lb 1kg each week Not all carbohydrate foods are created equal in fact they behave quite differently in our bodies The glycemic index or GI describes this difference by ranking carbohydrates according to their effect on our blood glucose levels The glycemic index ranks the foods from 0 100 according to the speed at which they affect your blood sugar levels in the 2 or 3 hours after eating Enjoy more than 195 recipes BREAKFAST SOUPS SALADS BAKED LIGHT MEALS CHICKEN BEEF SEA FOOD and DESERTS AND SMOOTHIE *The Structure House Weight Loss Plan* Gerard J Musante,2008 One of America s most respected weight loss experts presents his proven behavioral approach that has helped thousands attain their best weight Rather than focusing on what and how much to eat Dr Musante helps readers understand and address their relationship with food *The Wellspring Weight Loss Plan* Daniel S.
