Washington, Dennis T. Leaver, 2015-04-01 The only radiation therapy text written by radiation therapists Principles and Practice of Radiation

Therapy 4th Edition helps you understand cancer management and improve clinical techniques for delivering doses of radiation. A problem based approach makes it easy to apply principles to treatment planning and delivery. New to this edition are updates on current equipment procedures and treatment planning. Written by radiation therapy experts Charles Washington and Dennis Leaver, this comprehensive text will be useful throughout your radiation therapy courses and beyond. Comprehensive coverage of radiation therapy includes a clear introduction and overview plus complete information on physics simulation and treatment planning. Spotlights and shaded boxes identify the most important concepts. End of chapter questions provide a useful review. Chapter objectives, key terms, outlines, and summaries make it easier to prioritize, understand, and retain key information. Key terms are bolded and defined at first mention in the text and included in the glossary for easy reference. UPDATED chemotherapy section, expansion of What Causes Cancer, and inclusions of additional cancer biology terms and principles provide the essential information needed for clinical success. UPDATED coverage of post image manipulation techniques includes new material on Cone beam utilization, MR imaging, image guided therapy, and kV imaging. NEW section on radiation safety and misadministration of treatment beams addresses the most up to date practice requirements. Content updates also include new ASRT Practice Standards and AHA Patient Care Partnership Standards, keeping you current with practice requirements. UPDATED full color insert is expanded to 32 pages and displays images from newer modalities.

**Machine Learning and Artificial Intelligence in Radiation Oncology** Barry S. Rosenstein, Tim Rattay, John Kang, 2023-12-02

Machine Learning and Artificial Intelligence in Radiation Oncology: A Guide for Clinicians is designed for the application of practical concepts in machine learning to clinical radiation oncology. It addresses the existing void in a resource to educate practicing clinicians about how machine learning can be used to improve clinical and patient centered outcomes. This book is divided into three sections: the first addresses fundamental concepts of machine learning and radiation oncology, detailing techniques applied in genomics; the second section discusses translational opportunities such as in radiogenomics and autosegmentation; and the final section encompasses current clinical applications in clinical decision making, how to integrate AI into workflow, use cases, and cross collaborations with industry. The book is a valuable resource for oncologists, radiologists, and several members of the biomedical field who need to learn more about machine learning as a support for radiation oncology. Presents content written by practicing clinicians and research scientists, allowing a healthy mix of both new clinical ideas as well as perspectives on how to translate research findings into the clinic. Provides perspectives from artificial intelligence (AI) industry researchers to discuss novel theoretical approaches and possibilities on academic collaborations. Brings diverse points of view from an international group of experts to provide more balanced viewpoints on a complex topic.
