**Object Relations in Psychoanalytic Theory** Jay R. Greenberg, Stephen A. Mitchell, 1983-11-23  
Object Relations in Psychoanalytic Theory provides a masterful overview of the central issue concerning psychoanalysts today finding a way to deal in theoretical terms with the importance of the patient's relationships with other people Just as disturbed and distorted relationships lie at the core of the patient's distress so too does the relation between analyst and patient play a key role in the analytic process All psychoanalytic theories recognize the clinical centrality of object relations but much else about the concept is in dispute In their ground breaking exercise in comparative psychoanalysis the authors offer a new way to understand the dramatic and confusing proliferation of approaches to object relations The result is major clarification of the history of psychoanalysis and a reliable guide to the fundamental issues that unite and divide the field Greenberg and Mitchell both psychoanalysts in private practice in New York locate much of the variation in the concept of object relations between two deeply divergent models of psychoanalysis Freud's model in which relations with others are determined by the individual's need to satisfy primary instinctual drives and an alternative model in which relationships are taken as primary The authors then diagnose the history of disagreement about object relations as a product of competition between these disparate paradigms Within this framework Sullivan's interpersonal psychiatry and the British tradition of object relations theory led by Klein Fairbairn Winnicott and Guntrip are shown to be united by their rejection of significant aspects of Freud's drive theory In contrast the American ego psychology of Hartmann Jacobson and Kernberg appears as an effort to enlarge the classical drive theory to accommodate information derived from the study of object relations Object Relations in Psychoanalytic Theory offers a conceptual map of the most difficult terrain in psychoanalysis and a history of its most complex disputes In exploring the counterpoint between different psychoanalytic schools and traditions it provides a synthetic perspective that is a major contribution to the advance of psychoanalytic thought

*Formation and the Person* Alessandro Manenti, Stefano Guarinelli, Hans Zollner, 2007 This book gathers the foundational concepts which characterise the approach to the person as human and as Christian which has been developed at the Institute of Psychology of the Pontifical Gregorian University during its more than 35 years of activity The book directs these concepts towards further paths for investigation and puts them in dialogue with sister schools of depth psychology and with other areas of scholarship

in particular philosophy and theology which are equally interested in exploring the human mystery Hence the variety of authors psychologists philosophers and theologians brought together by a common interest in understanding and forming the human person in better ways The reflections contained in this book gain concrete expression in an educative therapeutic practice and they review the nodal points which are part of every journey of growth and of psychotherapy personal identity interaction with the external world and the attainment of personal truth inner imagination desires and affections conflicts Instruments are offered to enable the formator and the psychotherapist to make the best possible use of the great energies which are made available by their application how to identify the real problem where to concentrate one's attention what to listen to how to handle the relationship on what element to act in order to promote improvement cure what kind of change to propose While accompaniment and psychotherapy are different procedures they nevertheless have many similarities and points of contact The dynamic relations and the factors involved in growth which this book describes are valid for both modalities of intervention and will be of interest to anyone who wishes to help others in a more enlightened educative dialogue

**Cognitive Justice in a Global World** Boaventura de Sousa Santos, 2007-10-23 Cognitive Justice in a Global World Prudent Knowledges for a Decent Life is an edited collection that springs from the now dormant debates known as The Science Wars which questioned the nature of scientific theories Learning from the debates about the plurality of truths and opinions editor Boaventura de Sousa Santos has realized an opportunity for strengthening the relations between the natural and social sciences with more epistemological affinities and for opening up new transnational dialogues between scientists and other producers of knowledge This book analyses in detail some of the topics that amount to a set of problematic relations between science and ethics between objectivity and neutrality between the sociological and theoretical condition of production and the limits of scientific rigor between public faith in science and the economic powers that determine scientific priorities and between science and other kinds of knowledge existing in society Maintaining that global social injustice is by and large epistemological injustice and that there can be no global social justice without global cognitive justice Cognitive Justice in a Global World is an important collection for higher level students and researchers in the social sciences philosophy of science and intellectual history
