demise This book examines the consequences of its closure for Indigenous people communities and organisations The end of CDEP is first situated in its broader historical and political context the debates over notions of self determination versus mainstreaming and the enduring influence of concerns about passive welfare and mutual obligation In this way the focus on CDEP highlights more general trends in Indigenous policymaking and questions whether the dominant government approach is on the right track Each chapter takes a different disciplinary approach to this question variously focusing on the consequences of change for community and economic development individual work habits and employment outcomes and institutional capacity within the Indigenous sector Across the case studies examined the chapters suggest that the end of CDEP has heralded the emergence of a greater reliance on welfare rather than the increased employment outcomes the government had anticipated Concluding that CDEP was better than welfare in many ways the book offers encouragement to policymakers to ensure that future reforms generate livelihood options for Aboriginal and Torres Strait Islander Australians that are in turn better than CDEP

 Political Economy investigates and explores how far and in what ways the Covid 19 pandemic is challenging restructuring
 and perhaps remaking aspects of the global political economy Since the 1970s neoliberal capitalism has been the guiding

principle of global development fiscal discipline privatisations deregulation the liberalisation of trade and investment regimes and lower corporate and wealth taxation But after Covid 19 will these trends continue particularly when states are continuing to struggle with overcoming the pandemic and violating one of neoliberalism's key principles balanced budgets The pandemic has exposed the fragility of the global political economy and it can be argued that the intensification of global trade tourism and finance over the past 30 years has facilitated the spread of infectious diseases such as Covid 19 Therefore economies in lockdown jittery markets and massive government spending have sparked interest in potentially re-evaluating certain features of the global political economy This volume brings together leading and upcoming critical scholars in international relations and international political economy to provide novel timely and innovative research on how the Covid 19 pandemic is impacting and will continue to impact the global economy in important dimensions including state fiscal policy monetary policy the accumulation of debt health and social reproduction and the future of austerity and the fate of neoliberalism This book will be of great interest to students scholars and experts in international relations and international political economy as well as history anthropology political science sociology cultural studies economics development studies and human geography Chapter 8 of this book is freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com> under a Creative Commons Attribution Non-Commercial No Derivatives CC BY-NC-ND 4.0 license
