## **Anxiety Relief Ideas Open Now:**

How To Diagnose and Treat Your Anxiety Steven T. Griggs, Ph.D., 2018-06-17 I've been a psychologist in private practice in Southern California for over thirty two years I treat all kinds of anxiety disorders People call me up and tell me their symptoms Here's some you might have Apprehension tension uneasiness anticipation of danger motor tension autonomic hyperactivity fears preoccupations repetitive thoughts Vigilance scanning avoidance of situations or things panic sensations heart palpitations sweaty palms rapid breathing rigid or repetitive behaviors People schedule an office visit I ask them a full range of questions about their experiences and help them decide whether they actually need a psychologist I go through a very well honed process Here's some more symptoms Hypochondriasis trembling twitching feeling shaky muscle tension aches or soreness headaches dry mouth dizziness nausea Chest pains restlessness easy fatiguing shortness of breath or smothering sensations sweating cold or clammy hands For the experience clients pay for an office visit plus often have to deal with managed care or their insurance After having done this with clients for a long time I decided to write an ebook I call it How To Diagnose and Treat Your Anxiety It's so people can do this themselves It's about 46 pages and includes what I do with each client Each series of questions and considerations is presented in the order I do it in the office But you can follow along and do this yourself This ebook will help you identify symptoms of anxiety and show you how to rate the frequency and severity of your symptoms There's also a description of the seven basic types clinical categories of anxiety disorders Here's some more symptoms Lightheadedness diarrhea or other abdominal distress flushing hot flashes chills sleep problems racing thoughts Frequent urination trouble swallowing exaggerated startle response difficulty concentrating blank mind This ebook shows you how to figure out where you fall relative to others The charts are simple to interpret and right away you'll know whether or not to call a therapist This process is the one I've used for years You are following along with my thinking It is straightforward clear and effective But at the same time this is much more comprehensive clinically accurate than simple internet checklists Near the end I've included some treatment strategies that you usually don't get in a book or on the Internet Many of you do not need a therapist and even if you do the techniques I walk you through will decrease your anxiety symptoms without paying big bucks The treatment strategies are surprisingly helpful For those of you who do need a therapist this material will clearly show you why and outline the category or categories into which your symptoms fall You will know the exact information to give a professional if you need one This will help you to effectively shop for a therapist It also can be used to help others realize they may need some help especially if they are in denial While it is not meant to substitute for a professional's judgment and training this ebook will go a long way towards using professional knowledge to help you or someone you know make a very informed decision about their experiences of anxiety It will provide direction greater certainty and relief especially if your symptoms are a mystery
