Systems Ultra Georgina Voss, 2024-01-30 A TOOLBOX FOR COMPREHENDING AND CHANGING THE WORLD Systems Ultra explores how we experience complex systems the mesh of things people and ideas interacting to produce their own patterns and behaviours What does it mean when a car which runs on code drives dangerously What does massmarket graphics software tell us about the workplace politics of architects And in these human made systems which phenomena are designed and which are emergent In a world of networked technologies global supply chains and supranational regulations there are growing calls for a new kind of literacy around systems and their ramifications At the same time we are often told these systems are impossible to fully comprehend and are far beyond our control Drawing on field research and artistic practice around the industrial settings of ports air traffic control architectural software payment platforms in adult entertainment and car crash testing Georgina Voss argues that complex systems can be approached as sites of revelation around scale time materiality deviance and breakages With humour and guile she tells the story of what systems have come to mean how they have been sold to us and the real world consequences of the power that flows through them Systems Ultra goes beyond narratives of technological exceptionalism to explore how we experience the complex systems which influence our lives how to understand them more clearly and perhaps how to change them **Journal of Graphics Tools**, 2006
