Customer Service Management in Africa Robert Hinson, Ogechi Adeola, Terri Lituchy, Abednego Amartey, 2020-05-07 Customer Service Management in Africa: A Strategic and Operational Perspective 978 0 367 14337 4 K410515 Customer Service is Changing. The message of 34 authors featured in Customer Service Management in Africa: A Strategic and Operational Perspective is clear. Today's consumers are no longer passive audiences but active players that engage with businesses at each stage of product or service design and delivery systems. Consumer demands and expectations are also increasingly being dictated by changing personal preferences, enhanced access to information, and expanding digital reality. The customer service principles, strategic and operational, advocated by these authors are universal but particularly compelling as they apply to Africa's unique and dynamic operating environment. In recognition of the importance of excellent customer service, this comprehensive and well-timed book provides an essential guide on the increasing role of the customer to business success. This book discusses the management and delivery of customer service under seven broad themes: Customer Service as Shared Value, Customer Service Strategy, Customer Service Systems, Customer Service Style, Customer Service Culture, Customer Service Skills, and Customer Experience. Advancing Customer Service in Africa. Central questions posed and addressed include: What is the new definition of customer service management? How should organisations position themselves to create value for customers and stakeholders? How should employees project themselves to align with customer service promises made by their organisations? Overall, this book provides strategic and operational insights into effective customer service management in Africa. The customer service management concepts, roles, and practices outlined, particularly as they apply to the African context, make it an important addition to scholars or practitioners' reference works.

**Integrating Business, Management and Organisation Scholarship** Richard Breese, 2025-12-01 Businesses deliver value to their stakeholders including customers, employees, suppliers, communities, and shareholders. Therefore, value creation is pivotal to management theory, but there is a lack of agreement amongst scholars about value at the conceptual level. This book uses invariant properties of human activities to develop a novel theory of value to help resolve controversies and integrate scholarship from different specialisms. To establish boundaries for the task of integration, business management and organisation scholarship is identified as being an applied supra-disciplinary mega-field. Its fragmented nature means that different academic fields such as strategic

management and marketing approach the concept of value in distinct ways based on their respective roots in economics and other social sciences Tracing the evolution of ideas on value over time a new theoretical framework is developed the integrating theory of value co creation as an alternative to existing theories on value creation for individuals and organisations The cornerstone of the integrating theory of value co creation is that exchange is the fundamental basis for value co creation which enables it to cover both provider and customer perspectives Given its interdisciplinary approach this book will appeal to any social scientist interested in the management of organisations [EBOOK: Reshaping the University: New Relationships between Research, Scholarship and Teaching](#) Ronald Barnett,2005-09-16 What is the emerging shape of the University Are there spaces for present activities to be practised anew or even for new activities If these questions have force they show that the metaphors of shapes and spaces can be helpful in understanding the contemporary university Research teaching and scholarship remain the dominant activities in universities and so it is their relationships that form the main concerns of this volume Are these activities pulling apart from each other Or might these activities be brought more together in illuminating ways Is there space to redesign these activities so that they shed light on each other Is there room for yet other purposes In this volume a distinguished set of scholars engage with these pertinent but challenging issues Ideas are offered and evidence is marshalled of practices that suggest a re shaping of the University may be possible Reshaping the University appeals to those who are interested in the future of universities including students researchers managers and policy makers It also addresses global issues and it will therefore interest the higher education community worldwide Contributors Ronald Barnett David Dill Carol Bond Lewis Elton Mick Healey Mark Hughes Rajani Naidoo Mark Olssen Bruce Macfarlane Kathleen Nolan Jan Parker Michael Peters Alison Phipps Jane Robertson Peter Scott Stephen Rowland
