Market Entry Strategy in Germany* Andreas Kauerhof, 2017-03-01 Seminar paper from the year 2016 in the subject Business economics Business Management Corporate Governance grade 1.3 University of applied sciences Munich language English abstract The author of this assignment reviews the Tesla's business model approach and its strategy in the non-domestic German market. Tesla's firm-specific advantages are especially related to innovation of the vehicle, the battery, and the infrastructure. Tesla Motors follows a product strategy entering from premium market and moving towards mass market. After starting with a high-price Roadster model, Tesla launched the more affordable Sedan and a SUV model. In 2017 Tesla plans to launch its first mass-market EV. Tesla shows a new value chain in the automotive industry by a deep of vertical integration from EVs manufacturing towards software, recharging network, and battery manufacturing. Tesla entered the German market to export premium EVs. The Automaker also builds a charging network in Germany and prepares the market for its future mass production Model 3 coming in 2017. This work consists of three major parts. The first part deals with the theoretical background of international strategies for MNEs. The second part describes Tesla as a company and its strategy. The last part analyzes the competitive advantages of Tesla and shows how they are used to enter the German market. This work ends with a final reflection and a conclusion of the research.

**Tesla and the Car Dealers' Lobby** Daniel A. Crane, 2014 Tesla Motors the offspring of the South African American entrepreneur Elon Musk who also brought us PayPal and SpaceX is the most exciting automotive development in many decades and a marquee story of American technological dynamism and innovation The company's luxury electric cars have caused a sensation in the auto industry including a review by Consumer Reports calling Tesla's Model S the best car it ever tested Tesla faces enormous challenges in penetrating an automotive market that has been dominated for a century by internal combustion engines Not only must it build cars that customers want to drive and ultimately produce them cost effectively but it must build the battery swapping and charging infrastructure that make charging as easy and reliable as pumping gas These are tall orders But Tesla's R D technological and infrastructure challenges seem to be dwarfed these days by political challenges mounted by the powerful car dealers lobby Tesla has chosen a direct to consumer distribution model one that bypasses traditional franchised dealer networks and has Tesla operating its own showrooms and interacting with consumers directly over the Internet Not surprisingly this model has struck a deeply negative chord with the car dealers They prefer not to be cut out The dealers have responded by invoking decades old laws aimed at curbing direct distribution by car manufacturers and seeking new legislative or regulatory decisions aimed at closing any loopholes that might allow Tesla to distribute directly Thus far the dealers have succeeded in blocking Tesla in states like Texas South Carolina and New Jersey and are continuing to mount their campaign on a state by state level as Tesla's footprint grows The dealers have been successful largely on the backs of their political clout in local elections where they make significant campaign contributions They have attempted to justify the direct distribution bans as a form of consumer protection and public safety regulation

Slowly consumers are waking up to the fact that the dealers arguments are completely unfounded Consumer protection and public safety have nothing to do with these restrictions They are protectionism for car dealers pure and simple **Tesla Model S. Market and Sales Strategy** Erik Somssich,2017-04-03 Seminar paper from the year 2016 in the subject Business economics Offline Marketing and Online Marketing grade 1 3 University of applied sciences Cologne language English abstract The purpose of this assignment was to analyze the market and sales strategy of Tesla and to identify its Model 3 customers After ten years of waiting Tesla s CEO Elon Musk has presented Tesla Model 3 to the public for the first time in an evening show at the end of march 2016 Unveiled at the company s design studio in Hawthorne California in front of a crowd of whooping and cheering customers and journalists Model 3 is the most affordable Tesla so far hoped to bring electric cars to the mass market Musk stated that the car will deliver at least 215 miles of range beginning at just 35 000 dollar Musk is fairly confident that deliveries will begin by the end of 2017 and you will not be able to buy a better car for 35 000 dollar even with no options Also it will be one of the safest cars in the world according to Musk Even before Tesla unveiled its new middle class model there were more than 115 000 people who had paid already 1 000 dollar to reserve one of the highly anticipated electric cars These early buyers didn t know what the car would look like or that it would have a starting price of exactly 35 000 dollar They also didn t know how long the production and delivery would take **He Said, She Said Tesla**
