*Designing Games for Children* Carla Fisher, 2014-12-03 When making games for kids it's tempting to simply wing it on the design. We were all children once right? The reality is that adults are far removed from the cognitive changes and the motor skill challenges that are the hallmark of the developing child. *Designing Games for Children* helps you understand these developmental needs of children and how to effectively apply them to games. Whether you're a seasoned game designer, a children's media professional or an instructor teaching the next generation of game designers, *Designing Games for Children* is the first book dedicated to service the specific needs of children's game designers. This is a hands-on manual of child psychology as it relates to game design and the common challenges designers face. *Designing Games for Children* is the definitive comprehensive guide to making great games for kids featuring Guidelines and recommendations divided by the most common target audiences: babies and toddlers 0-2, preschoolers 3-5, early elementary students 6-8, and tweens 9-12. Approachable and actionable breakdown of child developmental psychology including cognitive, physical, social, and emotional development as it applies to game design. Game design insights and guidelines for all aspects of game production from ideation to marketing.

**Young Children Learning Through Schemas** Katey Mairs, 2013 This creative and highly engaging text describes how young children learn through exploring repeated patterns in their actions known as schemas and how they can help inform planning for children's learning.

**A-Z Of Play In Early Childhood** Moyles, Janet, 2012-10-01 The key themes in play are explored through an A-Z approach covering key concepts, theories, theorists, and figures. Rather than conventional chapters, there are brief sections outlining the main areas under any particular letter of the alphabet, the length dependent on the potential content for that letter. Topics range from baby play to holistic learning to kinaesthesia and therapy. This is a fun book which would be very useful on courses attempting to introduce students to all aspects of young children's play. A further feature of the book is that some well-known early years people, e.g. Profs Tricia David, Carol Aubrey, Angela Anning, Lilian Katz, etc. have agreed to write a very few original thoughts identifying their own passion and interest for a particular aspect of play or a particular influence in their lives.
