Twitter Guide: For Seniors Jacob Gleam,2015-05-21 Twitter is one of the many social media platforms that people use to communicate ideas jokes and other types of information The information is displayed in what are known as tweets which usually allow the twitter users a 140 character limit to share anything Twitter is used globally and can be used for business personal use and for group communications The site is a fun way to interact with others and it differs from other platforms in that the user gets to read the content in a short period and decide whether he or she would like to open any links found on the tweet to read it further **Complete Guide to Twitter Traffic** Stu Covacevick,2021 ntroduction To Twitter Profits It s likely that you ve heard of Twitter and perhaps you ve even tried to become an active member of this incredibly popular information network With Twitter people within the community post what are referred to as tweets Tweets are short messages and updates that people send out to everyone who chooses to follow them Each time a tweet is submitted it shows up on the public timeline and is pushed down as other new tweets are circulated throughout the network And while Twitter requires consistent activity in order to really take full advantage of its incredible resources you can begin building a targeted list in little time while generating a massive following of those who are interested in receiving your updates Within the twitter community people who choose to add you as a contact are referred to as followers and similar to a mailing list each follower can be considered a lead This is yet another way that growing a twitter following is similar to building an effective mailing list Each follower you receive should be interested in the niche market you are catering to so building massive following bases isn t the way to go Instead you want to build QUALITY lists of followers that are genuinely interested in your broadcasts and likely to respond to your offers and messages Think about twitter in a similar way as you would when building a mailing list or newsletter base If you have 100 targeted leads who have decided to subscribe to your ezine and actively

is easier to master Why First it is very friendly to automation That s right You can automate pretty much everything you do on Twitter Therefore a lot of people use it to make money from the Internet on autopilot They don t have to babysit each tweet They don t have to sit around to figure out what s going on They can pretty much set a strategy let the software do it let the process run for some time double check their work make some adjustments here and there and then let it run In other words Twitter is one of those platforms that you just must figure out in broad terms to lay out an initial strategy Implement that strategy and then learn from your results
