*The Oxford Handbook of the Economics of Gambling* Leighton Vaughan Williams, Donald S. Siegel, 2013 This handbook is a definitive source of path breaking research on the economics of gambling. It is divided into sections on casinos, sports betting, horse racing, betting strategy, motivation, behaviour and decision making in betting markets, prediction markets and political betting and lotteries, and gambling machines.

*Mathematical Modelling for Teachers* Jürgen Maaß, Niamh O'Meara, Patrick Johnson, John O'Donoghue, 2018-10-01 While there are many areas of focus in mathematics education, there are many good reasons for offering applicable mathematics education in schools. Let us just mention two of the most important reasons. On the one hand a focus on the practical side of mathematics presents a convincing and motivating answer to the typical student question Why study mathematics? On the other hand education policy seems inclined to move in this direction by implementing international testing curricula and catalogues of skills. The most important feature of this book is that the authors speak directly to you, the mathematics teachers. The authors attempt to draw you into a continuous dialogue about activities you are asked to engage in as learners. You are asked to do something and through doing and reflecting, you will gain first hand experience of new approaches and materials. In this way you can learn to teach applicable mathematics to your students using your own experience as learners of applicable mathematics, motivated and supported by the book. Here, applicable mathematics education is the phrase we use to describe reality based mathematics education. Reality based mathematics relies heavily on problem solving and a positive disposition to engage with mathematics. Modelling, reality and simulating selected aspects of reality are other pillars of reality based mathematics education.

**How to Find a Black Cat in a Coal Cellar** Joseph Buchdahl, 2013-01-25

How do we know if we can beat the bookmaker? That's easy just look at our bank balance. But how do we know if we've not just been lucky? More specifically, how do we know that someone who says he can do it and who is selling his expertise can keep doing it again and again through talent, skill and hard work? This book examines the techniques available to answer that question, to identify those qualities and to help the punter find value for money in an industry that appears to be largely built on trust and the influence of chance to uncover the truth about sports tipsters and ultimately how to find the best tipsters, the Black Cats.
