recipes help you save money and eat well this season Hungry Good Meal Prep Ideas For Beginners and Dummies Barbara Dawson, 2020-08-18 Meal prepping is making a meal or recipe then portioning it out to eat later. If you've ever had leftovers from dinner to take with you for lunch the next day, you've had a mini meal prepped. Generally, though, meal prepping refers to preparing 3-7 days worth of food at a time. Think of it like keeping lunches for the week later instead of eating them on the go. You can use this same technique for breakfast, lunch, dinner, and snacks. Meal prepping saves time, reduces waste, and reduces the temptation to eat outside your plan. Whether the plan is a diet or a budget, when keeping a meal plan, it's important to have a variety of meals without having to do the same thing every day. It's good for convenience and for more than variety. With meal prepping, you get to eat the same thing for a few days, so if you don't like leftovers or get bored with the same meal prepping for a week, it's not a problem. If having one meal a day is maximizing your time and budget, it's important to consider that every meal will be the same. This could be quite difficult for someone who likes variety. A meal is stored in the refrigerator for a few days, so it's slow to eat in a week. In addition to the way food is packed, the individual nuances of your flavor preferences can impact the taste. For example, refrigerated meals often have an acceptable texture and flavor, but the taste may not be what you prefer. Always begin with the FDA guidelines to keep your meal preferences in mind. It's important to consider that food is stored for days, so it's worth taking into account your taste preferences. I find that I like different foods on different days, so it's important to have a variety of meals prepared. The Plant-Based Athlete's Guide to Meal Planning: Recipes for Peak Performance
