practical applications particularly in the analysis and design of metal structures. Despite the excellent body of existing results concerning coupled instability structural behaviour this situation has not yet been adequately translated into design rules or specifications. In fact only to a small extent do modern design codes for metal structures take advantage of the significant progress made in the field. This book which contains all the invited general reports and selected papers presented at the Third International Conference on Coupled Instabilities in Metal Structures CIMS 2000 should provide a meaningful contribution towards filling the gap between research and practice.

Knowledge Incorporation in Evolutionary Computation Yaochu Jin, 2013-04-22

Incorporation of a priori knowledge such as expert knowledge, meta heuristics and human preferences as well as domain knowledge acquired during evolutionary search into evolutionary algorithms has received increasing interest in the recent years. It has been shown from various motivations that knowledge incorporation into evolutionary search is able to significantly improve search efficiency. However, results on knowledge incorporation in evolutionary computation have been scattered in a wide range of research areas and a systematic handling of this important topic in evolutionary computation still lacks. This edited book is a first attempt to put together the state of art and recent advances on knowledge incorporation in evolutionary computation within a unified framework. Existing methods for knowledge incorporation are divided into the following five categories according to the functionality of the incorporated knowledge in the evolutionary algorithms:

1. Knowledge incorporation in representation population initialization combination and mutation
2. Knowledge incorporation in selection and reproduction
3. Knowledge incorporation in fitness evaluations
4. Knowledge incorporation through life time learning and human computer interactions
5. Incorporation of human preferences in multi objective evolutionary computation

The intended readers of this book are graduate students, researchers and practitioners in all fields of science and engineering who are interested in evolutionary computation. The book is divided into six parts. Part I contains one introductory chapter titled 'A selected introduction to evolutionary computation' by Yao which presents a concise but insightful introduction to evolutionary computation.
