Child Exploitation and Communication Technologies Alisdair Gillespie,2008 New communication technology can help abusers gain access to children It can allow groups of abusers to communicate with and incite one another It can allow them to plan and undertake their abuse in new ways At the same time its apparent cover of anonymity can cause children to unwittingly knowingly or naively put themselves at greater risk Most of us are aware of some of these problems But are we

aware enough of how the various types of abuse happen why they happen and how perpetrators can be identified and prosecuted under law This book gives a conceptual understanding of new technologies new laws and new court decisions and provides insights into a range of sexually abusive behaviours that both evolve and stay distressingly the same It can help those who work and study in law and criminology those involved with safeguarding children those providing therapeutic responses to both perpetrators and those impacted by their abuse and those in IT industries who want to assist their efforts It explores offending behaviour of adults Each behavioural type is given a distinct chapter and common themes are drawn out including inappropriate adult response to being tempted by the behaviour exhibited by certain teenagers exploiting teenagers vulnerability and seeking to turn their experimentation into inappropriate sexual contact It examines the behaviour of children and young people This can include distributing personal sexual images to a sweetheart acts of self exploitation such as posting indecent images of themselves perhaps when dared or providing images of themselves when financially enticed cyber bullying harassment and sexually inappropriate behaviour by children themselves such as the filming of non consensual sexual attacks passing on inappropriate images received or seeking out sexual images of younger children It also explores issues of identity how and why people create different identities there and how and why some people are taken in or perhaps naively go along technology specific behaviours including those involving the world wide web email chatrooms including Internet Relay Chat IRC peer to peer systems short messaging system SMS aka text messages instant messenger and 3G technology Brief introductions to each of these technologies allow anyone unfamiliar with technological development to gain enough understanding to see how each technology can be used to facilitate the abuse of children This book presents social and corporate responses how the pressure to improve technology and get the next uses out there does not always appear to involve the same attention being given to social responsibility and how corporate responsibility can strive to ensure that the virtual world is safe for children It also examines legal and judicial responses how the law makes distinctions between different behaviours how it applies in different contexts and why different risk and understanding of risk can result in adoption of sometimes absolute limits and sometimes more dynamic ones Inside Flyer ,2007 **Fundraising on EBay** Greg Holden,Jill K.
