Drilling Down: Turning Customer Data into Profits with a Spreadsheet Jim Novo,2004-06-18 I spend a lot of time in marketing oriented discussion lists If you do you probably also sense the incredible frustration of people who keep asking about using their customer data to retain customers and increase profits Everybody knows they should be doing it but can't find out how to do it Consultants and agencies make this process sound like some kind of black magic something you can't possibly do yourself I disagree I think the average business owner can do a perfectly decent job creating profiles and using them to retain customers and drive profits Thus the book The examples provided are Internet specific but the methods can be used in any business where customer data is available This book is about the down and dirty nitty gritty art of taking chunks of data generated by your customers and making sense of it getting it to speak to you creating insight into what types of marketing or general business actions you can take to make your business more profitable We'll be talking about action oriented ideas you can generate on your own to drive sales and profits ideas that will reveal themselves by analyzing your own customer data using only a spreadsheet We have all heard how important it is to collect customer data to know your customer What I don't hear much about is what exactly you DO with all that data once you have collected it How is it used What exactly is Drilling Down into the data supposed to tell me and what am I looking for when I get there For that matter what data should I be collecting and how will I use it when I have it And how much is this process going to cost me
