Denham,Irene Kacandes,Jonathan Petropoulos,1997 Capitalizes on the ripeness of the German case for interdisciplinary investigation A Reference Guide to the Literature of Travel: Great Britain Edward Godfrey Cox,1949 Perceptual Issues in Visualization Georges Grinstein,Haim Levkowitz,2013-03-07 With the increase in the amount and dimensionality of scientific data collected new approaches to the design of displays of such data have become essential The designers of visual and auditory displays of scientific data seek to harness perceptual processes for data exploration The general aim is to provide ways for raw data and the statistical and mathematical structures they comprise to speak for themselves and thereby enable scientists to conduct exploratory in addition to confirmatory analyses of their data The present primary approach via visualization depends mainly on coding data as positions of visually distinguishable elements in a two or three dimensional euclidean space e g as discrete points comprising clusters in scatter plot displays and as patches comprising the hills and valleys of statistical surfaces These displays are immensely effective because the data are in a form that evokes natural perceptual processing of the data into impressions of the presence and spatial disposition of apparent materials objects and structures in the viewers apparent physical environment The problem with this mode of display however is that its perceptual potency is largely exhausted at dimension three while we increasingly face the need to explore data of much greater dimensionality The challenge posed for visualization researchers is to develop new modes of display that can push the dimensionality of data displays higher while retaining the kind of perceptual potency needed for data exploration **Monthly Catalog of United States Government Publications** ,1975 **A Reference Guide to the Literature of Travel** Edward Godfrey Cox,1949 **Compute** ,1993-05 The Cumulative Book Index ,1999 **Guide to Reference Books** Rita G.
