Analyzing Tesla. Their Business Model and Omni-Channel Strategy Philipp Rothe, 2023-05-25 Academic Paper from the year 2023 in the subject Business economics General grade 1.3 Boston University language English abstract This Paper analyzes the business model of Tesla and their Omni Channel Strategy Tesla Inc is an American electric vehicle and energy company founded by a group of engineers on July 1 2003 with the vision to accelerate the global transition to sustainable energy It's largest business is the sale of electric vehicles which makes up to 86% of the company's total revenue While the CEO Elon Musk drives the innovative character of the company

this innovative mind set and the passion for new technologies is also responsible for Tesla's omnichannel strategy which offers customers a unique experience they get from no other car manufacturer. Tesla's omnichannel approach can be described as an integrated approach to give customers the best possible experience across multiple channels when they interact with the brand. Although a central aspect of the omnichannel strategy is the interplay between the online and offline buying experience, Tesla's omnichannel approach is not limited to that. While Tesla has both car showrooms and an online store where you can buy their cars, Tesla uses many more channels to interact with the customer. Examples are social media, the car itself where you can buy updates like the autopilot or the smartphone app which can be used to unlock the car. Because other car manufacturers catch up with Tesla, our recommendations include but are not limited to stick with Elon Musk as the CEO and be open to new ideas and experiments he suggests, move on to new business opportunities connected to renewable energies or further improve the customer experience by making more use of available data.

Evaluation of the Marketing Strategy of Tesla Motors Inc Dominic Birk, 2015-11-06 Research Paper undergraduate from the year 2015 in the subject Business economics Offline Marketing and Online Marketing grade 1.0 University of applied sciences Cologne language English abstract Tesla Motors Inc is a car manufacturer which polarizes like no other company in this industry. It is often said that with its business model and its special strategic moves, Tesla confuses competitors, utilities and marketing agencies. Therefore, this assignment will focus on the analysis of the key aspects of Tesla's business model in order to find out why it is considered to be different. Moreover, the objective of this assessment is to find out whether this strategy is useful or if it should be changed. The market definition and analysis of the first assignment is hereby the basis for this evaluation of Tesla Motor's current marketing strategy. Therefore, the focus will be again on the company's domestic market, the United States of America. Furthermore, only Tesla's automotive products will be taken into consideration; its recently launched home battery will not be object of this work.

Tesla Model S. Market and Sales Strategy Erik Somssich, 2017-04-03 Seminar paper from the year 2016 in the subject Business economics Offline Marketing and Online Marketing grade 1.3 University of applied sciences Cologne language English abstract The purpose of this assignment was to analyze the market and sales strategy of Tesla and to identify its Model 3 customers. After ten years of waiting, Tesla's CEO Elon Musk has presented Tesla Model 3 to the public for the first time in an evening show at the end of March 2016. Unveiled at the company's design studio in Hawthorne, California, in front of a crowd of whooping and cheering customers and journalists, Model 3 is the most affordable Tesla so far. Tesla so far hoped to bring electric cars to the mass market. Musk stated that the car will deliver at least 215 miles of range beginning at just 35,000 dollars. Musk is fairly confident that deliveries will begin by the end of 2017 and you will not be able to buy a better car for 35,000 dollars even with no options. Also, it will be one of the safest cars in the world according to Musk. Even before Tesla unveiled its new middle class model, there were more than 115,000 people who had paid already 1,000 dollars to reserve one of the highly anticipated electric cars. These early buyers didn't know what the car would look like.

or that it would have a starting price of exactly 35 000 dollar They also didn t know how long the production and delivery would take **Definition and Market Analysis of the Tesla Motors Model S** Erik Somssich,2017-04-04 Seminar paper from the year 2016 in the subject Business economics Offline Marketing and Online Marketing grade 1 3 University of applied sciences Cologne course Marketing language English abstract The purpose of this document is to analyse the strategic marketing positioning of Tesla Motors with the focus on its premium electric car Model S From the text The Company Tesla Motors Business Analysis Market Analysis Market Positioning and Strategy **Tesla Model S** Diaz,2016-08-01 Tesla Model S is the new 21st century automotive leader Discover the electrifying facts about this unusual car that you simply have to plug in charge up and take off
