**Learning Rates of Electric Vehicles** Andreas Zerfaß, 2017-11-01 Governments of many countries consider the electrification of individual passenger transport as a suitable strategy to decrease oil dependency and reduce transport related carbon dioxide CO<sub>2</sub> and air pollutant emissions. However, battery electric vehicles (BEVs) and plug-in hybrid electric vehicles (PHEVs) have been more expensive than their conventional counterparts and suffer from relatively short electric driving ranges which still hampers the market potential of these vehicles. Despite persisting shortfalls, mechanisms such as technological learning and economics of scale promise to improve the techno-economic performance of BEVs and PHEVs in the short to mid term. Here, the author seeks to obtain insight into the techno-economic prospects of BEVs and PHEVs by i) establishing experience curves and ii) quantifying user costs and the costs of mitigating carbon dioxide and air pollutant emissions in a time series analysis. The analysis captures the situation in Germany between 2010 and 2016.

**Financial Data and Implementing Financial Models Using R** Clifford S. Ang, 2021-06-23 This advanced undergraduate/graduate textbook teaches students in finance and economics how to use R to analyse financial data and implement financial models. It demonstrates how to take publicly available data and manipulate, implement models and generate outputs typical for particular analyses. A wide spectrum of timely and practical issues in financial modelling are covered, including return and risk measurement, portfolio management, option pricing and fixed income analysis. This new edition updates and expands upon the existing material, providing updated examples and new chapters on equities simulation and trading strategies, including machine learning techniques. Select data sets are available online.

**The Inversion Factor** Linda Bernardi, Sanjay E. Sarma, Kenneth Traub, 2018-09-11 Why companies need to move away from a product first orientation to pursuing innovation based on customer need. In the past, companies found success with a product first orientation: they made a thing, that did a thing. The Inversion Factor explains why the companies of today and tomorrow will have to abandon the product first orientation. Rather than asking 'How do the products we make meet customer needs?', companies should ask 'How can technology help us reimagine and fill a need?'. Zipcar, for example, instead of developing another vehicle for moving people from point A to point B, reimagined how people interacted with vehicles. Zipcar inverted the traditional car company mission. The authors explain how the introduction of smart objects connected by the Internet of Things signals fundamental changes for business. The IoT, where real and digital coexist, is powering new ways to meet human needs. Companies that know this include giants like Amazon, Airbnb, Uber, Google, Tesla, and Apple, as well as less famous companies like Tile, Visenti, and Augury. The Inversion Factor offers a roadmap for businesses that want to follow in their footsteps. The authors chart the evolution of three IoTs: the Internet of Things, devices connected to the Internet, the Intelligence of Things, devices that host software applications, and the Innovation of Things, devices that become experiences. Finally, they offer a blueprint for businesses making the transition to inversion, and interviews with leaders of major companies and game-changing startups.

Proceedings of the 2022 International Conference on Business and Policy Studies Xiaolong Li, Chunhui Yuan, Ivoslav Ganchev, 2022-09-26 This proceedings volume contains papers accepted by the 2022 International Conference on Business and Policy Studies CONF BPS 2022 which are carefully selected and reviewed by professional reviewers from corresponding research fields and the editorial team of the conference. This volume presents latest research achievements, inspirations and applications in applied economy, finance, enterprise management, public administration and policy studies. CONF BPS hopes this volume could be inspiring and of academic value. Business and policy studies both are heated research topics and are related to multiple fields. Held by Eliwise Academy, CONF BPS aims at bringing together intellectuals from related fields including applied economy, finance and public administration for academic exchange. Its goal is to serve as an international platform for researchers to present latest research progress, share ideas and inspirations and exchange experience. Through more academic communication and exchange, this conference hopes to promote international corporation and joint initiatives in relevant fields. This volume will be of interest to researchers, academics, professionals and policy makers in the field of business, economics, management and policy studies.

**Supply Chain Network Design** Nick Vyas, Das Dasgupta, Greys Sošić, 2024-05-03 The traditional linear supply chain is no longer fit for purpose and organizations must redesign their supply chains to become more customer driven, agile, resilient and sustainable. Supply Chain Network Design shows how to design intelligent, agile supply chain networks in the age of geopolitical disruptions, fast-paced technological innovation and drive for more sustainable business. It outlines how to incorporate international relations and a global perspective into supply chain planning and actions, and how to embed ESG and circular economy goals. It surveys the rapidly evolving technology landscape and how it impacts some companies and provides a competitive advantage to others. It also explores how to harness technologies such as robotic process automation, AI and machine-driven intelligence, and the evolution of forecasting to demand sensing to enhance network design. Taking a global perspective, Supply Chain Network Design is supported by practical cases and examples, and provides a consumer-driven lens that will help organizations evolve their networks from a traditional B2B to a B2B2C workflow. Covering both lessons learned and how to move forward, this will be a must-read for supply chain logistics and distribution leaders, managers, and analysts.
