Urban & Regional Technology & Development ,1987 *Search* Stefan Weitz,2016-11-03 Search is as old as language
 We ve always needed to find something in the jumble of human creation The first web was nothing more than passing verbal
 histories down the generations so others could find and remember how not to get eaten the first search used the power of
 written language to build simple indexes in printed books leading to the Dewey Decimal system and reverse indices in more
 modern times Then digital happened Besides having profound societal impacts it also made the act of searching almost
 impossibly complex for both engines and searchers Information isn t just words it is pictures videos thoughts tagged with
 geocode data routes physical world data and increasingly the machines themselves reporting their condition and listening to
 others Search How the Data Explosion Makes Us Smarter holds up a mirror to our time to see if search can keep up Author
 Stefan Weitz explores the idea of access to help readers understand how we are inventing new ways to search and access
 data through devices in more places and with more capabilities We are at the cusp of imbuing our generation with
 superpowers but only if we fundamentally rethink what search is how people can use it and what we should demand of it
 Search How The Data Explosion Makes Us Smarter is the first title from GreenHouse Collection Created by the founders of
 Insight Labs the world s first philanthropic think tank GreenHouse Collection features books that encourage deeper
 exploration and inquiry to inform new models for social good **MRIS Abstracts** Maritime Research Information
