It allows for decisions to be made that are underlined by theoretical economic principles but utilized in such a way that they transform into real work applications. Topics of the conference include studies in many fields including environmental development, financial forensic information, institutional, international, labor, managerial, mathematical, monetary, tourism and many more. Applied economics affects all aspects of life and science and it is brought to the forefront in this collection of papers. The conference with its aim to bring together economists from different fields lends itself to a natural and rich collection of scientific papers all focused on the practical application of economic principles. The scope of this collection of papers will be useful to academics and practitioners who look to economics to help solve problems.
