Multimedia Retrieval Data Centric Systems And Applications:

Multimedia Retrieval Henk M. Blanken, Arjen P. de Vries, Henk Ernst Blok, Ling Feng, 2007-08-13 Based on more than 10 years of teaching experience Blanken and his coeditors have assembled all the topics that should be covered in advanced undergraduate or graduate courses on multimedia retrieval and multimedia databases. The single chapters of this textbook explain the general architecture of multimedia information retrieval systems and cover various metadata languages such as Dublin Core, RDF or MPEG. The authors emphasize high level features and show how these are used in mathematical models to support the retrieval process. For each chapter there is detail on further reading and additional exercises and teaching material is available online.

Multimodal Processing and Interaction Petros Maragos, Alexandros Potamianos, Patrick Gros, 2008-12-16 Multimodal Processing and Interaction: Audio, Video and Text presents high quality state of the art research ideas and results from theoretic, algorithmic and application viewpoints. This edited volume contains both state of the art reviews and original contributions by leading experts in the scientific and technological field of multimedia. It grew out of a four year collaboration among research groups participating in the European network of Excellence on Multimedia Understanding, Semantics, Computation and Learning (MUSCLE). Multimodal Processing and Interaction: Audio, Video and Text covers a broad spectrum of novel perspectives, analytic tools, algorithms, design practices and applications in multimedia science and engineering, with emphasis on multimodal integration and modality fusion. This volume also contains contributions in the area of interaction with multimedia, especially multimodal interfaces for accessing multimedia content. Multimodal Processing and Interaction: Audio, Video and Text is designed for a professional audience composed of practitioners and researchers in industry and academia. This book is suitable for advanced level students in computer science and engineering as well.

Advances in Multimedia Information Processing - PCM 2006 Yueting Zhuang, 2006-10-24 This book constitutes the refereed proceedings of the 7th Pacific Rim Conference on Multimedia (PCM 2006) held in Hangzhou, China in November 2006. The 116 revised papers presented cover a wide range of topics including all aspects of multimedia, both technical and artistic perspectives and both theoretical and practical issues.

Transactions on Large-Scale Data- and Knowledge-Centered Systems XLVII Abdelkader Hameurlain, A. Min Tjoa, Richard Chbeir, 2021-01-16 The LNCS journal *Transactions on Large Scale Data and Knowledge Centered Systems* focuses on data management, knowledge discovery and knowledge processing which are core and hot topics in computer science. Since the 1990s the Internet has become the main driving force behind application development in all domains. An increase in the demand for resource sharing across different sites connected through networks has led to an evolution of data and knowledge management systems from centralized systems to decentralized systems, enabling large scale distributed applications providing high scalability. This the 47th issue of *Transactions on Large Scale Data and Knowledge Centered Systems* constitutes a special issue focusing on Digital Ecosystems and Social Networks. The 9 revised selected papers cover topics that include Social Big

Transactions on Large-Scale Data- and Knowledge-Centered Systems XXXIII Abdelkader Hameurlain, Josef Küng, Roland Wagner, Reza Akbarinia, Esther Pacitti, 2017-08-07 The LNCS journal *Transactions on Large Scale Data and Knowledge Centered Systems* focuses on data management knowledge discovery and knowledge processing which are core and hot topics in computer science. Since the 1990s the Internet has become the main driving force behind application development in all domains. An increase in the demand for resource sharing across different sites connected through networks has led to an evolution of data and knowledge management systems from centralized systems to decentralized systems enabling large scale distributed applications providing high scalability. Current decentralized systems still focus on data and knowledge as their main resource. Feasibility of these systems relies basically on P2P peer to peer techniques and the support of agent systems with scaling and decentralized control. Synergy between grids P2P systems and agent technologies is the key to data and knowledge centered systems in large scale environments. This the 33rd issue of *Transactions on Large Scale Data and Knowledge Centered Systems* contains five revised selected regular papers. Topics covered include distributed massive data streams storage systems scientific workflow scheduling cost optimization of data flows and fusion strategies.

Proceedings of World Conference on Artificial Intelligence: Advances and Applications Ashish Kumar Tripathi, Darpan Anand, Atulya K. Nagar, 2023-11-01 This book is a collection of outstanding research papers presented at the World Conference on Artificial Intelligence Advances and Applications WCAIAA 2023 organized by Sir Padampat Singhania University India and is technically sponsored by Soft Computing Research Society during March 18 19 2023. The topics covered are agent based systems evolutionary algorithms approximate reasoning bioinformatics and computational biology artificial intelligence in modeling and simulation natural language processing brain machine interfaces collective intelligence computer vision and speech understanding data mining swarm intelligence machine learning human computer interaction intelligent sensor devices and applications and intelligent database systems
Social Network Data Analytics Charu C. Aggarwal, 2011-03-18 Social network analysis applications have experienced tremendous advances within the last few years due in part to increasing trends towards users interacting with each other on the internet. Social networks are organized as graphs and the data on social networks takes on the form of massive streams which are mined for a variety of purposes. Social Network Data Analytics covers an important niche in the social network analytics field. This edited volume contributed by prominent researchers in this field presents a wide selection of topics on social network data mining such as Structural Properties of Social Networks Algorithms for Structural Discovery of Social Networks and Content Analysis in Social Networks. This book is also unique in focussing on the data analytical aspects of social networks in the internet scenario rather than the traditional sociology driven emphasis prevalent in the existing books which do not focus on the unique data intensive characteristics of online social networks. Emphasis is placed on simplifying the content so that students and

practitioners benefit from this book This book targets advanced level students and researchers concentrating on computer science as a secondary text or reference book Data mining database information security electronic commerce and machine learning professionals will find this book a valuable asset as well as primary associations such as ACM IEEE and Management Science

Data Mining with Ontologies: Implementations, Findings, and Frameworks Nigro, Hector Oscar, Gonzalez Cisaro, Sandra Elizabeth, Xodo, Daniel Hugo, 2007-07-31 Prior knowledge in data mining is helpful for selecting suitable data and mining techniques pruning the space of hypothesis representing the output in a comprehensible way and improving the overall method This book examines methodologies and research for the development of ontological foundations for data mining to enhance the ability of ontology utilization and design Provided by publisher

Systems and Applications, 2001 Web Information Retrieval Stefano Ceri, Alessandro Bozzon, Marco Brambilla, Emanuele Della Valle, Piero Fraternali, Silvia Quarteroni, 2013-08-30 With the proliferation of huge amounts of heterogeneous data on the Web the importance of information retrieval IR has grown considerably over the last few years

Big players in the computer industry such as Google Microsoft and Yahoo are the primary contributors of technology for fast access to Web based information and searching capabilities are now integrated into most information systems ranging from business management software and customer relationship systems to social networks and mobile phone applications Ceri and his co authors aim at taking their readers from the foundations of modern information retrieval to the most advanced challenges of Web IR To this end their book is divided into three parts The first part addresses the principles of IR and provides a systematic and compact description of basic information retrieval techniques including binary vector space and probabilistic models as well as natural language search processing before focusing on its application to the Web Part two addresses the foundational aspects of Web IR by discussing the general architecture of search engines with a focus on the crawling and indexing processes describing link analysis methods specifically Page Rank and HITS addressing recommendation and diversification and finally presenting advertising in search the main source of revenues for search engines The third and final part describes advanced aspects of Web search each chapter providing a self contained up to date survey on current Web research directions Topics in this part include meta search and multi domain search semantic search search in the context of multimedia data and crowd search The book is ideally suited to courses on information retrieval as it covers all Web independent foundational aspects Its presentation is self contained and does not require prior background knowledge It can also be used in the context of classic courses on data management allowing the instructor to cover both structured and unstructured data in various formats Its classroom use is facilitated by a set of slides which can be downloaded from www search computing org
