

# Multiplicative Comparison

A multiplicative comparison is a way of comparing two quantities by asking how many times larger or smaller one quantity is than the other quantity. Multiplicative comparisons involve the operations of multiplication and division to solve problems.

Lucas and Ryan are working on a construction project for school. Lucas's wooden board is 5 times the length of Ryan's board. If Ryan's wooden board is 3 feet, how long is Lucas's wooden board?

3 feet

→ Ryan

3 feet

**A Focus on Multiplication and Division** Elizabeth T. Hulbert, Marjorie M. Petit, Caroline B. Ebby, Elizabeth P. Cunningham, Robert E. Laird, 2023-07-04 The second edition of this book offers a unique approach to making mathematics education research on the teaching and learning of multiplication and division concepts readily accessible and understandable to preservice and in-service K-6 mathematics teachers. Revealing students' thought processes with extensive annotated samples of student work and vignettes characteristic of classroom teachers' experience, this book provides teachers a research-based lens to interpret evidence of student thinking to inform instruction and ultimately improve student learning. Based on research gathered in the Ongoing Assessment Project OGAP and updated throughout this engaging and easy-to-use resource, it also features the following new chapters on the OGAP Multiplicative Reasoning Framework and Learning Progressions and Using the OGAP Multiplicative Progression to inform instruction and support student learning. In chapter sections on how Common Core State Standards for Math are supported by math education research Case Studies focusing on a core mathematical idea and different types of instructional responses to illustrate how teachers can elicit evidence of student thinking and use that information to inform instruction. Big Ideas frame the chapters and provide a platform for meaningful exploration of the teaching of multiplication and division. Looking Back Questions at the end of each chapter allow teachers to analyze student thinking and to consider instructional strategies for their own students. Instructional Links to help teachers relate concepts from each chapter to their own instructional materials and programs. Accompanying online Support Material that includes an answer key to Looking Back questions as well as a copy of the OGAP Fraction Framework and Progression A. **A Focus on Multiplication and Division** is part of the popular **A Focus on** collection designed to aid the professional development of preservice and in-service mathematics teachers. As with the other volumes on addition and subtraction, ratios and proportions, and fractions, this updated new edition bridges the gap between what math education researchers know and what teachers need to know to better understand evidence in student work and make effective instructional decisions.

**Handbook of Research on Mathematics Teaching and Learning** Douglas Grouws, 2006-11-16 This book makes vital scholarship accessible to professors, students, researchers, and educators. It provides a framework for understanding the evolution of mathematics education research, covering conceptual, historical, theoretical, and methodological perspectives. An indispensable tool for research in mathematics education.

**Eureka Math Curriculum Study Guide** Common Core, 2015-03-23 Eureka Math is a comprehensive, content-rich PreK-12 curriculum that follows the focus and coherence of the Common Core State Standards in Mathematics (CCSSM) and carefully sequences the mathematical progressions into expertly crafted instructional modules. The companion Study Guides to Eureka Math gather the key components of the curriculum for each grade into a single location, unpacking the standards in detail so that both users and non-users of Eureka Math can benefit equally from the content presented. Each of the Eureka Math Curriculum Study Guides

includes narratives that provide educators with an overview of what students should be learning throughout the year information on alignment to the instructional shifts and the standards design of curricular components approaches to differentiated instruction and descriptions of mathematical models The Study Guides can serve as either a self study professional development resource or as the basis for a deep group study of the standards for a particular grade For teachers who are new to the classroom or the standards the Study Guides introduce them not only to Eureka Math but also to the content of the grade level in a way they will find manageable and useful Teachers familiar with the Eureka Math curriculum will also find this resource valuable as it allows for a meaningful study of the grade level content in a way that highlights the coherence between modules and topics The Study Guides allow teachers to obtain a firm grasp on what it is that students should master during the year The Eureka Math Curriculum Study Guide Grade 4 provides an overview of all of the Grade 4 modules including Place Value Rounding and Algorithms for Addition and Subtraction Unit Conversions and Problem Solving with Metric Measurement Multi Digit Multiplication and Division Angle Measure and Plane Figures Fraction Equivalence Ordering and Operations Decimal Fractions and Exploring Measurement with Multiplication
