EXPLORING POUL ANDERSON'S WORLDS

A detailed illustration of a futuristic landscape. In the foreground, a small, sleek vehicle with a glowing engine is driving on a paved road that cuts through a valley. The valley walls are composed of large, layered rock formations with various colors like blue, green, and yellow. The sky above is a deep, dark blue with wispy white clouds. The overall atmosphere is one of a distant, advanced civilization.

Poul Anderson,1969 *In Search of the Multiverse* John Gribbin,John R. Gribbin,2010 We once had to abandon the idea of earth being at the centre of the universe Now we need to confront an even more profound possibility the universe itself might just be one universe among many In Search of the Multiverse takes us on an extraordinary journey examining the most fundamental questions in science What are the boundaries of our universe Can there be different physical laws from the ones we know Are there in fact other universes Do we really live in a multiverse This book is a search the ultimate search exploring the frontiers of reality Ideas that were once science fiction have now come to dominate modern physics And as John Gribbin shows there is increasing evidence that there really is more to the universe than we can see Gribbin guides us through the different competing theories there is more than one multiverse revealing what they have in common and what we can come to expect He gives a brilliant tour of the current state of cosmology John Gribbin is our best most accessible guide to the big questions of science And there is no bigger question than our search for the multiverse
