Football, Gambling, and Everyday Life in Zimbabwe Manase Kudzai Chiweshe, 2023-10-27 As unemployment soared in Zimbabwe in the early twenty first century betting on football soccer emerged as a popular if unsustainable livelihood option and the number of betting halls mushroomed This book investigates this growing social phenomenon providing a holistic analysis of football gambling in Zimbabwe and exposing its impact on the everyday lives of Zimbabweans Drawing on original empirical and theoretical analysis from across six different areas of Zimbabwe the book highlights the lived experiences of communities that are only beginning to grapple with the long term effects of addiction Explaining its historical origins in the colonial and immediate post colonial periods the authors delve into the motivations patterns practices and impacts of soccer betting Tackling issues such as gender livelihoods addiction religion and tradition related to soccer betting the book lays bare the general lack of policy frameworks and support services to protect vulnerable populations This book offers a rare glimpse into a sociological phenomenon sweeping across Zimbabwe with a particularly stark impact on the country's youth It will interest sports and African studies researchers as well as those focusing on the socio health problems related to gambling

Logic of Statistical Inference Ian Hacking, 1965-01-01 This book is a philosophical study of the basic principles of statistical reasoning Professor Hacking has sought to discover the simple principles which underlie modern work in mathematical statistics and to test them both at a philosophical level and in terms of their practical consequences for statisticians The ideas of modern logic are used to analyse these principles and results are presented without the use of unfamiliar symbolism It begins with a philosophical analysis of a few central concepts and then using an elementary system of logic develops most of the standard statistical theory the analysis provides answers to many disputed questions about how to test statistical hypotheses and about how to estimate quantities in the light of statistical data One product of the analysis is a sound and consistent rationale for R A Fisher's controversial concept of fiducial probability
